YFM660F Grizzly 660 (2002-2008)

"Mining exploration investment in the Latin American and Caribbean region has increased 130 percent in the last five years, a figure which increases to 500 percent, if Chile is excluded." Governments have revamped mining legislation to enable private investment while becoming more sensitive to environmental factors. In light of this legislation, this report examines the environmental effects of artisanal, small, and medium mines in three Latin American Countries: Bolivia, Chile, and Peru. Four of the most important elements to be considered are: • The age of the mine • Management of tailings • The heterogeneity of the artisanal and small mine sectors • The increasing need to take cultural considerations into account in the decision making process. The paper contains results of the studies on the various mining sectors, strategy and policy recommendations, and country study summaries.

I got into medical school by saying I was black. I lied. Honestly, I am about as black as my sister Mindy Kaling (The Office / The Mindy Project). Once upon a time, I was an ethically challenged, hard-partying Indian American frat boy enjoying my third year of college. That is until I realized I didn't have the grades or scores to get into medical school. Legitimately. Still, I was determined to be a doctor and discovered that affirmative action provided a loophole that might help. The only problem? I wasn't a minority. So I became one. I shaved my head, trimmed my long Indian eyelashes, and applied as an African American. Not even my frat brothers recognized me. I joined the Organization of Black Students and used my middle name, Jojo. Vijay, the Indian American frat boy, became Jojo, the African American affirmative action applicant. Not everything went as planned. During a med school interview, an African American doctor angrily confronted me for not being black. Cops harassed me. Store clerks accused me of shoplifting. Women were either scared of me or found my bald black dude look sexually mesmerizing. What started as a scam to get into med school turned into a twisted social experiment that taught me lessons I would never have learned in the classroom. I became a serious contender at some of America's greatest schools, including Harvard, Wash U, UPenn, Case Western, and Columbia. I interviewed at 11 schools while posing as a black man. After all that, I finally got accepted into medical school. Before I finished this book, I stirred a hornet's nest by telling my story. It has been featured in more than 100 media outlets, including CNN, NBC, TIME, FOX, and Huffington Post. Many loved it, but not everyone approved of what I did. My college classmate Tucker Max (I Hope They Serve Beer in Hell) disapproved. My sister Mindy Kaling furiously declared, "This book will bring shame on our family!" I disagree but I'll let you be the judge.

This edited volume seeks to redress the lack of scholarly work that takes promotion seriously as a form of social, cultural, political, and economic exchange. It unpacks the vernacular, the institutional structures, and the practices and performances that make up promotional culture in everyday life, offering diverse critical perspectives on how, as citizens, consumers, and users, we absorb, navigate, confront, and resist its influence. Contributions from both renowned scholars and emerging intellectuals make this book a timely and valuable contribution to the fields of media and communication studies, political science, cultural studies, sociology, and anthropology. "Melissa Aronczyk and Devon Powers have compiled a cutting-edge volume that impressively combines the work of established and rising scholars who address the power and scope of branding in our increasingly marketing-oriented culture. Its insights about the role of promotion and branding in such sectors of life as politics, art, activism, social networking, medicine, geography, academia, ethnicity, and the media make this an exciting book that is a must-read for those interested in critical-consumer studies and promotional culture."---Matthew. P. McAllister, Penn State University "In a world where seemingly everything-products, people, politics-is branded, *Blowing Up the Brand* is a welcome intervention. Bringing together many of the finest minds studying the subject, the editors have assembled a singularly useful guide for navigating-and challenging-the current state of ubiquitous commodification."---Stephen Duncombe, New York University; Author of *Dream: Re-imagining Progressive Politics in an Age of Fantasy*

In the first book to explore the religious ideals and background of the 43rd president of the United States, *The Faith of George W. Bush* discusses how Bush's spiritual beliefs shape his private life as well as drive his policies and politics. More than any other presidency in recent years, George W. Bush's presidency is "faith based." He has often said that faith saved his life, nurtured his family, established his political career, and helped form the destiny of the nation. Discover how Bush incorporates his faith and belief in God into every detail of life. From his devotional time alone each morning to his frequent use of Scripture in his speeches, the president relies upon his faith to direct his actions and goals. *The Faith of George W. Bush* recounts Bush's conversion to Christianity in 1986, when he overcame a growing dependence on alcohol by turning to the Bible to save his marriage and family. From the tragedy of September 11 to the conflict in Iraq, President Bush has learned to use his faith to help him live his public and private life. This revealing book will inspire others to do the same.
