In Europe, at least from 1979 to 1983 manual start 9.9hp motors uses a lanyard man overboard kill cord BUT the clip is attached to a different secondary kill button which is located in the normal location as the electric starter button located in the US. This lanyard clip, when pulled out kills the motor.

Your little Johnson 9.9 hp outboard has been there for you for more years than you care to remember. It was never the biggest outboard back in 1983 when it was originally manufactured, and by today's standards it's tiny compared to the 300+ hp open water engines, but that was never your thing.
