8: Brian Titeley, A Narrow Vision: Duncan Campbell Scott and the Administration of Indian Affairs in Canada (Vancouver: University of British Columbia Press, 1986), 91–92. As a result of the amendment, indigenous enrollment rose to about 17,000 in all schools and to over 8,000 in residential schools by the end of his tenure.

11.7 From Agricultural Training to Residential School ...

In A Narrow Vision, Brian Titeley chronicles Scott's career in the Department of Indian Affairs and evaluates developments in Native health, education, and welfare between 1880 and 1932. He shows how Scott's response to challenges such as the making of treaties in northern Ontario, land claims in British Columbia, and the status of the Six Nations caused persistent difficulties and made Scott's term of office a turbulent one. Scott could never accept that Natives had legitimate grievances and held adamantly to the view that his department knew best.

At the Bridge chronicles the little-known story of James Teit, a prolific ethnographer who, from 1884 to 1922, worked with and advocated for the Indigenous peoples of British Columbia and the northwestern United States. From his base at Spences Bridge, BC, Teit forged a participant-based anthropology that was far ahead of its time. Whereas his contemporaries, including famed anthropologist Franz Boas, studied Indigenous peoples as members of “dying cultures,” Teit worked with them as members of living cultures resisting colonial influence over their lives and lands. Whether recording stories, mapping place-names, or participating in the chiefs’ fight for fair treatment, he made their objectives his own. With his allies, he produced copious, meticulous records; an army of anthropologists could not have achieved a fraction of what he achieved in his short life. Wickwire’s beautifully crafted narrative accords Teit the status he deserves, consolidating his place as a leading and innovative anthropologist in his own right.

The Frontier World of Edgar Dewdney is a biography of a man who played a key role in the events which marked the political, social, and economic transformation of western Canada in the latter half of the nineteenth century. An immigrant adventurer seeking his fortune in the colonies, Dewdney was embroiled in the gold rushes of the 1860s, the B.C. debates on Confederation, the Riel Rebellion of 1885, political evolution in the North-West Territories, and the Klondike gold rush. In following his exploits, we follow the story of a region experiencing breathtaking change.

First published in 1992, The Imaginary Indian is a revealing history of the “Indian” image mythologized by popular Canadian culture since 1850, propagating stereotypes that exist to this day. Images of First Nations people have always been fundamental to Canadian culture. From the paintings and photographs of the 19th century to the Mounted Police sagas and the spectacle of Buffalo Bill’s Wild West Show; from the performances of Pauline Johnson, Grey Owl, and Buffalo Long Lance to the media images of Oka and the Vancouver Winter Olympics;the Imaginary Indian is ever with us, oscillating throughout our history from friend to foe, from Noble Savage to bloodthirsty warrior, from debased alcoholic to wise elder, from monosyllabic “squaw” to eloquent princess, from enemy of progress to protector of the environment. The Imaginary Indian has been, and continues to be—as Daniel Francis reveals in this book—just about anything the non-Native culture has wanted it to be; and the contradictory stories non-Natives tell about Imaginary Indians are really stories about themselves and the uncertainties that make up their cultural heritage. This is not a book about Native people; it is the story of the images projected upon Native people—and the desperate uses to which they are put. This new edition, published almost twenty years after the book’s first release, includes a new preface and afterword by the author. Daniel Francis is an award-winning historian and the author of twenty books.

Restoring nearly forgotten perspectives to the historical record, John Long considers the methods used by the government of Canada to explain Treaty No. 9 to Northern Ontario First Nations. He shows that many crucial details about the treaty’s contents were omitted in the transmission of writing to speech, while other promises were made orally but not included in the written treaty. Reproducing the three treaty commissioners’ personal journals in their entirety, Long reveals the contradictions that suggest the treaty parchment was never fully explained to the First Nations who signed it.”-pub. website.

The Royal Society of Canada’s mandate is to elect to its membership leading scholars in the arts, humanities, social sciences, and sciences, lending its seal of excellence to those who advance artistic and intellectual knowledge in Canada. Duncan Campbell Scott, one of the architects of the Indian residential school system in Canada, served as the society’s president and dominated its activities; many other members – historically overwhelmingly white men – helped shape knowledge systems rooted in colonialism that have proven catastrophic for Indigenous communities. Written primarily by current Royal Society of Canada members, these essays explore the historical contribution of the RSC and of Canadian scholars to the production of ideas and policies that shored up white settler privilege, underpinning the disastrous interaction between Indigenous peoples and white settlers. Historical essays focus on the period from the RSC’s founding in 1882 to the mid-twentieth century; later chapters bring the discussion to the present, documenting the first steps taken to change damaging patterns and challenging the society and Canadian scholars to make substantial strides toward a better future. The highly educated in Canadian society were not just bystanders: they deployed their knowledge and skills to avert colonialism. This volume dives deep into the RSC’s history to learn why academia has more often been an aid to colonialism than a force against it. Royally Wronged poses difficult questions about what is required – for individual academics, fields of study, and the RSC – to move meaningfully toward reconciliation.

Throughout the nineteenth and most of the twentieth century, the majority of Canadians argued that European “civilization” must replace Indigenous culture. The ultimate objective was assimilation into the dominant society. Seen but Not Seen explores the history of Indigenous marginalization and why non-Indigenous Canadians failed to recognize Indigenous societies and cultures as worthy of respect. Approaching the issue biographically, Donald B. Smith presents the commentaries of sixteen influential Canadians – including John A. Macdonald, George Grant, and Emily Carr – who spoke extensively on Indigenous subjects. Supported by documentary records spanning over nearly two centuries, Seen but Not Seen covers fresh ground in the history of settler-Indigenous relations.

This book is an absolute first in its comprehensive treatment of this subject. J.R. Miller has written a new chapter in the history of relations between indigenous and immigrant peoples in Canada.

Earth into Property: The Bowl with One Spoon, Part Two explores the relationship between the dispossession of Indigenous peoples and the making of global capitalism. Beginning with Christopher Columbus’s inception of a New World Order in 1492, Anthony Hall draws on a massive body of original research to produce a narrative that is audacious, encyclopedic, and transformative in the new light it sheds on the complex historical processes that converged in the financial debacle of 2008 and 2009.

A broad exploration of the colonial roots of global capitalism and the worldwide quest of Indigenous people for liberation through decolonization.
