This is the only early years guide available to combine ICT pedagogy and practice; perfect for starting children off to computing technology; and a user-friendly and completely accessible text. This book will show practitioners how they can cover the foundation stage curriculum for ICT and prepare the children for the new computing curriculum for KS1. It will provide pedagogical clarity and show schools and pre-schools what it is that they need to be doing to demonstrate outstanding practice. Computational thinking will also be extended beyond the use of computers, and its relevance to supporting the child's wider cognitive development and learning will be emphasised.

"A 22-volume, highly illustrated, A-Z general encyclopedia for all ages, featuring sections on how to use World Book, other research aids, pronunciation key, a student guide to better writing, speaking, and research skills, and comprehensive index"--

In Venture Capital and the Finance of Innovation, future and current venture capitalists will find a useful guide to the principles of finance and the financial models that underlie venture capital decisions. Assuming no knowledge beyond concepts covered in first-year MBA course, the text serves as an innovative model for the valuation of start ups, and will familiarise you with the relationship between risk and return in venture capital, historical statistics on the performance of venture capital investments, total and partial valuation--and more.
