aluminum structures can weigh 35 to 65 percent less than steel, while providing equivalent strength.

Aluminum Construction and Building | The Aluminum Association
Bridges and Buildings. Around 1960, several aluminum highway bridges were built in the U.S. Consequently, and since its first appearance in 1967, the Specification for Aluminum Structures has addressed both bridges and buildings with a different set of safety factors for each. For example, while the Specification set a safety factor on tensile rupture of 1.95 for buildings, the safety factor ...
