Commissioner of police Rakesh Agrawal on Saturday extended the ban on writing [police], [army] and other such ... modification of silencers of Royal Enfield Bullet motorcycles.

The nervous geopolitical tension between East and West, the Cold War, emerged before the end of the Second World War and lasted until 1991 with the collapse of the Soviet Union. The British Army of the Rhine was born in 1945 out of the British Liberation Army at the close of the war as the military government of the British zone of occupied Germany. As the Soviet threat increased, so BAOR became less of an occupational army and assumed the role of defender of Western Europe, and as a major contributor to NATO after 1949.This book traces and examines the changing role of BAOR from 1945 to its demise in the 1993 Options for Change defence cuts. It looks at the part it played in the defence of West Germany, its effectiveness as a Cold War deterrent, the garrisons and capabilities, logistics and infrastructure, its arms and armour, the nuclear option and the lives of the thousands of families living on the front line.

Royal Enfield's famous motor - 'made like a gun' - hints at the factory's origins, but few appreciate that it is the oldest motorcycle manufacturer in existence that can boast of continuous production. In addition, its famous Bullet can claim the longest motorcycle production run of all time. Greg Pullen charts the rise, fall and rise again of Royal Enfield, from the company's pre-motorcycle beginnings in Redditch, through the impact of two World Wars, the importance of exports to India and subsequent establishment of factories there, to changes in ownership, recently launched models and new concept bikes for the future. With 190 colour photographs, this book includes: the V-twins, from the 1930s K and KX range to a glimpse of the concept V-twin shown in 2018; the singles, from 2-strokes to side-valve 4-strokes, and the ohv version that first used the Bullet name, through to the new singles built in India. The British Bullet: its arrival in 1948 and production in the UK, the original orders from India and subsequent setting up of production there are discussed. The 250s, (1958-68), including the Turbo Twins, and the big twins, from the 1948 500 Town to the final interceptor in 1970, including the 800cc prototype and the Clymer Indians are covered. The new twins: the 650cc Royal Enfield interceptor and Continental GT twins and the Bobber concept bike are discussed. Competition success is covered, with notable ISDT achievements, star rider Johnny Brittain and racing the big twins, and Geoff Duke in the GP5. Finally, the British factories and the new opportunities with the Indian factories are remembered.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
