AD(H)S bedeutet weit mehr als nur eine Beeinträchtigung von Konzentration und Verhalten. Seine genetisch bedingte

Stirnhirnunterfunktion mit Reizüberflutung und Botenstoffmangel hat eine dichtere Vernetzung von Nervenbahnen im Gehirn zur Folge. Diese Besonderheit verleiht den Betroffenen nicht nur Nachteile, sondern auch besondere Fähigkeiten, über die sie leider bei ausgeprägter AD(H)S-Problematik nicht immer verfügen können. Eine rechtzeitige multimodale Behandlung mit individueller und problemorientierter lern- und verhaltenstherapeutischer Begleitung sowie dem Praktizieren eines Selbstmanagements kann verhindern, dass Selbstwertgefühl und Sozialverhalten in eine Negativspirale geraten. Das erzeugt Dauerstress, der Ursache für viele psychische und psychosomatische Erkrankungen ist. Das vorliegende, in fünfter Auflage überarbeitete Buch zeigt Kindern, Jugendlichen und Erwachsenen, was sie tun können, damit sie nicht unter ihrem AD(H)S leiden, sondern dessen Vorteile nutzen können.

Junge Menschen in den stationären HzE/der Eingliederungshilfe sind psychosozial hoch belastet und weisen oft psychische Störungen auf. Dies erfordert komplexe und qualifizierte Handlungsansätze in einem multiprofessionellen Zusammenspiel heil- und sozialpädagogischer, psychotherapeutischer, kinder- und jugendpsychiatrischer und sonderpädagogischer Expertise. Über sozialrechtliche und wissenschaftliche Aspekte führt der Band in die Grundlagen Therapeutischer Heimerziehung ein. Die Darstellung der verschiedenen Systeme und ein Überblick über kinder- und jugendpsychiatrische Störungsbilder spannen die Rahmenbedingungen auf, bevor spezifische heilpädagogischtherapeutisch Handlungsmethoden vorgestellt werden. Eine multidisziplinäre und systemübergreifende Perspektive ist durch fachkundige Autoren aus unterschiedlichen Bereichen gegeben.

Because of its unique focus on teaching the critical social skills that autistic children lack, this book has been cited by ""Library Journal"" as ""Essential to All Collections.""

Subjective human rights of children are reasonably fathomed cooperatively by practice, activism and research. Approaches in interdisciplinary learning and teaching in childhood and children's rights are demonstrated as possibilities for social change through acquiring competencies to think and act children's rights. This book is dedicated to Manfred Liebel and focuses on his life's work. He has, throughout his life and work, combined social scientific childhood theories and children's rights discourses with practical, topical examples of protagonism and agency of children and young people in different national and international contexts.

Resilience is the human capacity to deal with stress and adversity and emerge stronger for the experience. This volume contains ten contributions from members of the helping professions (e.g. psychologists, doctors, teachers) dealing with the fostering of resilience, particularly in children and youth.

This now classic text remains a cornerstone of continuing efforts to develop inclusive peer play programs for children on the autism spectrum. The second edition has been thoroughly revised to reflect major new developments in the field of autism. Notable additions include an updated description of the Integrated Play Groups (IPG) model and related research; an examination of the nature of autism and of play from past to present, with major updates on incidence, diagnosis, and characteristics; and a comprehensive review of play interventions. Presenting vivid descriptions of three children with autism over a 10-year period (from age 5 to age 16), *Play and Imagination in Children with Autism: Traces the development of the children as they overcome obstacles to enter into the play culture of their peers.* Focuses on two critical years during which the children participated in a peer play group. Documents the emergence of remarkable transformations in the children's social relations with peers and symbolic activity. Includes vignettes, dialogue, and samples of writing and drawing to bring the children's stories to life. Lays out the implications for new directions in research and practice. Pamela J. Wolfberg is Associate Professor of special education and Director of the autism spectrum graduate program (Project Mosaic) at San Francisco State University. "Play and Imagination in Children with Autism has been the cornerstone of my professional and personal life for nearly a decade. This updated edition retains the original accessible style, explaining so clearly the pivotal role that peer play holds in the lives of individuals on the autism spectrum, while providing readers with cutting-edge developments in theory, research, and practice in the field." —Heather McCracken, Founder/Executive Director, Friend 2 Friend Social Learning Society "Dr. Wolfberg continues to break new ground with the second edition of her book. What a pleasure for any child to get involved in one of her integrated play groups, and what a relief for parents to know that their child is both learning and having fun! This is a wonderful resource for professionals interested in creating engaging and effective social skills groups for children on the autism spectrum." —Connie Kasari, UCLA Graduate School of Education and Information Studies "Children with autism benefit in so many ways from social play experiences, despite the significant challenges in symbolic development. Dr. Pamela Wolfberg, a leading expert in this crucial aspect of children's development, once again guides us in a highly engaging manner in supporting social and play development for children with ASD." —Barry M. Prizant, Director, Childhood Communication Services, Brown University "This book is a 'must' for anyone who wants to bring about genuine social reciprocity and imagination in children with autistic spectrum disorders.

Pamela Wolfberg takes us on a journey through previously uncharted territory, documenting in rich qualitative detail how to scaffold entry into the culture of peer play.” —Adriana L. Schuler, San Francisco State University “Dr. Wolfberg has done a fine and sensitive job in characterizing the pivotal role that play skills hold in the social and linguistic world of the child with autism. Her development of Integrated Peer Play Groups, and the delineation of the autistic child as the ‘Novice Player’ and the typical child as the ‘Expert Player,’ is a very valuable heuristic tool to all who work with children with autism.” —Bryna Siegel, Langley Porter Psychiatric Institute, University of California, San Francisco
