A one-year project initiated by the Office of the Secretary of Defense (OSD), Scientific Test and Analysis Techniques Center of Excellence (STAT COE) and sponsored by Navy OPNAV N94 set out to:

Automated software testing in the DoD: current practices ...

IDT is a leader in providing automated software testing solutions, called Automated Test and Re-Test (ATRT), to DOD and its contractors. Software development is still an art and that makes automated software testing a special challenge. At IDT (www.idtus.com) we strive to meet that challenge by producing an extensible automated testing framework. Page 3/11

Automated Software Testing For Dod Challenges And Solutions

Leveraging Software-Defined Automated Test to Enable Digital Transformation in Aerospace and Defense Nov 20, 2020 Many aerospace and defense companies of all sizes are pursuing digital transformation projects to become more competitive.

Leveraging Software-Defined Automated Test to Enable ...

Monday the company announced its delivery of new automated testing software to ensure the security of mobile applications used across DOD components and other federal agencies. The software tests for National Information Assurance Partnership (NIAP) compliance, a standard that will help mobile apps receive faster authority to operate (ATO) approvals, the company said.

DoD expands testing of mobile apps with new automated ...

IDT is a leader in providing automated software testing solutions, called Automated Test and Re-Test (ATRT), to DOD and its contractors. Software development is still an art and that makes automated software testing a special challenge. At IDT (www.idtus.com) we strive to meet that challenge by producing an extensible automated testing framework.

Automated Test and Re-Test (ATRT) and DoD Challenges and ...

ATRT Automated Test and ReTest (ATRT) is a U.S. Navy initiative originating from the DOD's SBIR program. ATRT provides a patented methodology which is enabling the DOD to decrease testing time and manpower, increase software quality, and reduce total ownership costs across the DOD enterprise.

IDT Innovative Defense Technologies Automated ...

1.2 Weapons and Software and Systems, Oh My! A Taxonomy for DoD Not all software systems are the same and therefore it is important to optimize development , processes and oversight mechanisms to the different types of software DoD uses. We distinguish here between two different aspects of software: operational function(use) and implementation

Chapter 1. Who Cares: Why Does Software Matter for DoD?

The Department of Defense announced \$600 million in awards for 5G experimentation and testing at five U.S. military test sites, representing the largest full-scale 5G tests for dual-use applications

DoD Announces \$600 Million for 5G Experimentation and ...

designated defense acquisition programs, special interest programs, and other designated automated information system (AIS) programs. Approve operational test plans, and OT&E portions of test planning documents for major and other designated defense acquisition programs, special interest programs, and major and other designated AIS programs.

Test & Evaluation Management Guide

DOD-STD-2167A (Department of Defense Standard 2167A), titled "Defense Systems Software Development", was a United States defense standard, published on February 29, 1988, which updated the less well known DOD-STD-2167 published 4 June 1985. This document established "uniform requirements for the software development that are applicable throughout the system life cycle."

DOD-STD-2167A Wikipedia

Automated Test and ReTest (ATRT) is a U.S. Navy initiative originating from the DOD's SBIR program. ATRT provides a patented methodology which is enabling the Navy to decrease testing time and manpower, to increase software quality, and to reduce total ownership costs across the Navy enterprise.

Automated Solutions for the DoD

The PM shall also ensure that automated test processes, tools and/or environments are certified by the test community and the automated test process includes, to the greatest extent practicable, frequent and recurring tests that address cyber and software assurance considerations throughout the software lifecycle. The automated build scripts and test results shall be available to government testers, so they can reuse/recreate any test artifact.

Software Acquisition | Adaptive Acquisition Framework

Automated configuration management, unit testing, software/hardware-in-the-loop (SIL/HIL) testing, continuous integration, A/B testing, usage and issues tracking, and other modern tools of software...

Defense Innovation Board Ten Commandments of Software

Reduced testing time and manpower: Automated tests run significantly faster than manual tests, are less labor-intensive, and provide the capability to verify thousands to millions of test permutations in minutes to hours. For our DOD customers, this translates to accelerating the delivery of capability to the warfighter. Cost savings: Automation can markedly reduce the costs involved in producing first-rate software. Savings result from not only reduced test time and manpower but also from ...

What is Automated Software Testing? IDT Automated ...

plan, develop, build, test, release, deliver, deploy, operate, and monitor. In DevSecOps, testing and security are shifted to the left through automated unit, functional, integration, and security testing - this is a key DevSecOps differentiator since security and functional capabilities are tested and built simultaneously.

DoD Enterprise DevSecOps Reference Design

Automated testing is a key part of DevSecOps. It is enabled by multiple tools that measure both test code coverage and test results. They are fully automated and do not require human action. It also enables new concepts like pair programming and peer code review.
