his textbook is designed to teach a first course in Information Technology (IT) to all undergraduate students. In view of the all-pervasive nature of IT in today ' s world a decision has been taken by many universities to introduce IT as a compulsory core course to all Bachelor ' s degree students regardless of their specialisation. This book is intended for such a course. The approach taken in this book is to emphasize the fundamental " Science " of Information Technology rather than a cook book of skills. Skills can be learnt easily by practice with a computer and by using instructions given in simple web lessons that have been cited in the References. The book defines Information Technology as the technology that is used to acquire, store, organize,

process and disseminate processed data, namely, information. The unique aspect of the book is to examine processing all types of data: numbers, text, images, audio and video data. As IT is a rapidly changing field, we have taken the approach to emphasize reasonably stable, fundamental concepts on which the technology is built. A unique feature of the book is the discussion of topics such as image, audio and video compression technologies from first principles. We have also described the latest technologies such as ‘ e-wallets ’ and ‘ cloud computing ’ . The book is suitable for all Bachelor ’ s degree students in Science, Arts, Computer Applications, and Commerce. It is also useful for general reading to learn about IT and its latest trends. Those who are curious to know, the principles used to design jpg, mp3 and mpeg4 compression, the image formats—bmp, tiff, gif, png, and

This approach supports the essential role of authenticity in the development of the whole person. It has been used in contexts around the world and has shown great promise in helping to re-chart the course for education and to re-think its purpose in global and democratic societies. The book looks at the current educational context and the need for core reflection; introduces the theory and its linkages to previous studies in numerous disciplines; presents various applications in multinational research and practice—with teachers, with students and schools, and with teacher educators; and highlights ongoing work in around the world along with future plans, opportunities, and resources for professional development and research. .
