Industry insider, veteran executive, and working mom Hilarie Gamm pulls the curtain back on the destruction of the American technology industry in her groundbreaking work, Billions Lost: The American Tech Crisis and the Road Map to Change. Gamm connects the dots between seemingly disparate events and facts, and outlines with stunning clarity the perfect storm that created a massive exodus of tech industry jobs from the U.S. Extensively researched and firmly apolitical, Billions Lost explains how the offshoring of millions of U.S. technology jobs opened a gateway that places our economy, our national security, and our educational systems at risk. Gamm succinctly explains the Y2K scare, visa reform, and other factors that snowballed into today's crisis, and identifies the ramifications of outsourcing on our country and its profound impact on America's middle class. To spark a national conversation, Gamm closes with her Road Map to Change: 20 actions that can reverse the trend, improve education, save the middle class, and return growth, security, and prosperity to America.

Partial contents: plenary sessions (intellectual property & national security; technology transfer; economic espionage); workshops (establishing an OPSEC program); acquisition/treaties (arms control synergism; on-site inspection); counterintelligence/ intelligence (Chinese security & economic interests; enviro- terrorism); counterintelligence/law enforcement (counter-narcotics); economics (Japanese business intelligence; protecting trade secrets); general issues (computer crime; literature intelligence; FOIA requests; deception & cognition); technology (semiconductor industry; unclassified technology; call diversion).

The determinants of a firm's innovative capacity are rooted in organizational design, incentives, human resources, internal culture, and external linkages. Profiting from innovation is always a challenge and licensing is one of many options.

This volume, in both print and electronic (CD-ROM) form, comprises original and never-before published research on asphalt paving, including sustainable mix formulations (with recycled asphalt and shingle content), binder performance, data on cracking and wear, as well as novel testing protocols emerging from the "Guide for the Mechanistic and Empirical Design of New and Rehabilitated Pavement" (MEPDG). The technical information in the book was presented at the 2011 annual meeting of the Association for Asphalt Paving Technologists. The CD-ROM displays figures and illustrations in articles in full color along with a title screen and main menu screen. Each user can link to all papers from the Table of Contents and Author Index and also link to papers and front matter by using the global bookmarks which allow navigation of the entire CD-ROM from every article. Search features on the CD-ROM can be by full text including all key words, article title, author name, and session title. The CD-ROM has Autorun feature for Windows 2000 with Service Pack 4 or higher products along with the program for Adobe Acrobat Reader with Search 9.0. One year of technical support is included with your purchase of this product.

Green Technology: An A-to-Z Guide explores the essential role of technology and its most recent developments toward a sustainable environment. Twofold in its definition, green technology includes the changing of existing technology toward energy conservation as well as the creation of new, clean technology aimed at utilizing renewable resources. With a primary focus on waste management, the volume presents more than 150 articles in A-to-Z format featuring such disciplines as nanoscience, biochemistry, information technology, and environmental engineering. Scholars and experts in their fields present a full range of topics from applications of green technology to The Green Grid global consortium to membrane technology and water purification systems to waste-to-energy technology. This work culminates in an outstanding reference available in both print and electronic formats for academic, university, and public libraries. Vivid photographs, searchable hyperlinks, an extensive resource guide, numerous cross references, and a clear, accessible writing style make the Green Society volumes ideal for classroom use as well as for research.

This book explores the economic and political impact of US aggression and the rise of China. Charting the impact of globalization from the Greek and Roman Empires onwards, the contemporary challenges posed by globalization is analysed in relation to both multinational companies and Wall Street banks. The influence of the World Trade Organization is investigated, with a particular focus on how it has created a Washington consensus throughout the world. This book aims to provide a non-Western perspective on global capitalism and the dangers it creates. It will be relevant to students and researchers interested in political economy, economic history, and development economics. Dipak Basu is Emeritus Professor in Economics at Nagasaki University, Japan. He obtained a PhD from the University of Birmingham, England. Previously, he was a Research Officer at the Department of Applied Economics, University of Cambridge and a Lecturer in Econometrics at the Institute of Agricultural Economics, University of Oxford.
