Briggs and Stratton Oil Seals - Jacks Small Engines

You can determine this by the color of the wires - either AC volts or DC amps. These wires extend beneath the blower housing and are connected to the stator. For Briggs & Stratton® engines, you can match up the wires and alternator's configuration with your Alternator Identification Chart. Once you find a match, find the AC/DC setting in the ...

*NOTE: Briggs & Stratton engines are not designed to run on E85 fuel. E85 is a blend of 85% ethanol (alcohol) and 15% gasoline, which is not compatible with most engines intended to run on regular gasoline. While alcohol is an excellent octane booster, it delivers less power, having an energy value of only about 77,000 Btu per gallon versus 114,000 Btu for regular gasoline.
