Child life programs facilitate coping and the adjustment of children and families in 3 primary service areas: 1) providing play experiences; 2) presenting developmentally appropriate information about events and procedures; and 3) establishing therapeutic relationships with children and parents to support family involvement in each child's care.

[Child Life Services | American Academy of Pediatrics](#)

The authors then discuss parents' needs and parent involvement, the hospital play program, and ways in which the hospital environment contributes to children's reactions. Equally thorough information is presented on the relationship of child life to other disciplines; supervision of volunteers, students and staff; and the development of a child life program.
