A complete

denture is a

removable

appliance used

when all teeth

within a jaw have

Download File

PDF Clinical

been lost and need to be prosthetically replaced. In contrast to a partial denture, a complete denture is constructed when there are no more teeth left in an arch, hence it is an exclusively tissue-supported prosthesis. A complete denture

Download File

PDF Clinical

can be opposed by natural dentition, a partial or complete denture, fixed appliances or, sometimes, soft tissues.

Prosthodontics

Abstract. The copy denture technique is a misnomer for the clinical and laboratory procedures involved in making complete dentures that replicate most

Download File

PDF Clinical

of the features of the original prosthesis. The aim is to replicate the good features of an otherwise successful prosthesis that now requires replacement and to alter the poor features and so it is strictly speaking not a copy.
