Relationship to post-colonial literature. Colonialism often creates a setting which results in the migration of large numbers of people, either within the colonies or from them to the "imperial centre" (Britain, France etc.). Consequently, migrant literature and postcolonial literature show some considerable overlap. However, not all migration takes place in a colonial setting, and not all postcolonial literature deals with migration.

Migrant literature and postcolonial literature show some considerable overlap. However, not all migration takes place in a colonial setting, and not all postcolonial literature deals with migration. A question of current debate is the extent to which postcolonial theory also speaks to migration literature in non-colonial settings.

Colonial and Postcolonial Literature is the leading critical overview of and historical introduction to colonial and postcolonial literary studies. Highly praised from the time of its first publication for its lucidity, breadth, and insight, the book has itself played a crucial part in founding and shaping this rapidly expanding field. The author, an internationally renowned postcolonial critic, provides a broad contextualizing narrative about the evolution of colonial and postcolonial writing in English. Illuminating close readings of texts by a wide variety of writers - from Kipling and Conrad through to Kincaid, from Ngugi to Noonuccal and Naipaul - explicate key theoretical terms such as 'subaltern', 'colonial resistance', 'writing back', and 'hybridity'. This revised edition includes new critiques of postcolonial women's writing, an expanded and fully annotated bibliography, and a new chapter and conclusion on postcolonialism exploring keynote debates in the field relating to sexuality, transnationalism, and local resistance.

In recent years, Europe has had to constantly rethink and redefine its attitude toward new flows of immigrations. Issues of boundaries and identity have been integral to this reflection. Through a magnificent collection of essays, Migrant Cartographies examines both sites and conflicts and the way in which forms of belonging and identity have been reinvented. With careful analysis and exceptional insight, this volume explores the most recent literature on migration as seen from different European viewpoints. This book fills a conspicuous void in migration literature, as there are no comprehensive books on migrant literatures in Europe that address the full range of complexities of colonial legacies and linguistic productions.

In this book Ulbe Bosma explores the experience of immigrants in the Netherlands over sixty years and three generations. Looking at migrants from all countries, Bosma teases out how their ethnic identities are informed by Dutch culture, and how these immigrant identities evolve over time. "Fascinating, comprehensive, and historically grounded, this essential volume reveals how the colonial past continues to shape multicultural Dutch society. . . . It is an

These transfers of sovereignty resulted in extensive, unforeseen movements of citizens and subjects to their former countries. The phenomenon of postcolonial migration affected not only European nations, but also the United States, Japan and post-Soviet Russia. The political and societal reactions to the unexpected and often unwelcome migrants was significant to postcolonial migrants' identity politics and how these influenced metropolitan debates about citizenship, national identity and colonial history. The contributors explore the historical background and contemporary significance of these migrations and discuss the ethnic and class composition and the patterns of integration of the migrant population.

The history of migration is deeply entangled with colonialism. To this day, colonial logics continue to shape the dynamics of migration as well as the responses of states to those arriving at their borders. And yet migration studies has been surprisingly slow to engage with colonial histories in making sense of migratory phenomena today. This book starts from the premise that colonial histories should be central to migration studies and explores what it would mean to really take that seriously. To engage with this task, Lucy Mayblin and Joe Turner argue that scholars need not forge new theories but must learn from and be inspired by the wealth of literature that already exists across the world. Providing a range of inspiring and challenging perspectives on migration, the authors' aim is to demonstrate what paying attention to colonialism, through using the tools offered by postcolonial, decolonial and related scholarship, can offer those studying international migration today. Offering a vital intervention in the field, this important book asks scholars and students of migration to explore the histories and continuities of colonialism in order to better understand the present.

Migrant Form examines the works of James Joyce, Salman Rushdie, and Satyajit Ray for the anti-colonial arguments in their unsettled, and unsettling, aesthetics. Among the questions it engages are the following: What are the aesthetic moves through which art expresses its resistance to dominance and demands for conformity? How can we define anti-colonial aesthetics? How do these aesthetics manifest themselves in different media such as literature and film? Contending that Joyce inaugurates an anti-colonial «aesthetics of reconstitution», the book mines such aesthetics in *Ulysses* and *Finnegans Wake* to propose a formal model for postcolonialism. It also draws on that exercise to consider how Rushdie extends a play with reconfigured forms into an overt politics in two of his novels (*Midnight's Children* and *The Satanic Verses*). Turning its attention to film, the book contests the common view of Ray as a gentle realist and examines a formal restlessness in Ray's earlier work, *Charulata* (*The Lonely Wife*), before demonstrating how Ray stages his preference for restlessness in his final film, *Agantuk* (*The Stranger*).

Using three literary analyses to show what happens once we leave behind the theoretical poverty of celebratory readings of contemporary migration and hybridity literature, this book offers a way out of the theoretical deadlock of putting hybridity against purity or flux against fixity.

This book examines the influence of imperialism and colonialism on the formation of national identities in the Nordic countries, exploring the manner in which contemporary discourses in Nordic society are rendered meaningful or obscured by references to past events and tropes related to the practices and ideologies of colonialism. Against the background of Nordic 'exceptionalism', it explores the manner in which the interwoven racial, gendered and nationalistic ideologies associated with the colonial project form part of contemporary Nordic identities. An important challenge to national identities that can become increasingly inward looking, *Whiteness and Postcolonialism in the Nordic Region* sheds light on the ways in which certain notions and

structural inequalities, understood as residue from the colonial period, become recreated or projected onto different groups. Presenting a variety of case studies drawn from Sweden, Finland, Norway, Greenland, Denmark and Iceland, this book will be of interest to scholars across the social sciences and humanities conducting research in the fields of race and ethnicity, identity and belonging, media representations of 'the other' and colonialism and postcolonialism.

As the velocity and intensity of migrations increase around the world, legal citizenship and ethnicity are becoming two of the most contested issues facing the modern state. Many of today's debates about immigration are focused on arguments around the positive and negative effects of increased ethnic diversity and who should be entitled to legal membership. What does it mean politically then to arrive in a country privileged as a legal citizen or co-ethnic? This book is the first to comparatively analyze the political realities of Dutch Antillean citizens in the Netherlands, and Latin American Nikkeijin (Japanese descendants) in Japan, who inherit host state access as post-colonial citizens and ethnic immigrants. Sharpe's unique cross-regional investigation considers the ways in which globalization, immigration, citizenship, and ethnicity interact as a means to understanding some of the strains and contradictions of membership in contemporary liberal democratic states. *Postcolonial Citizens and Ethnic Migration* will appeal to a wide range of scholars in political science, sociology, anthropology, international relations, ethnic studies and migration.

The twentieth century has witnessed the rise of a large population of postcolonial intellectual migrants «willingly» arriving from formerly colonized countries into the United Kingdom, the United States, and Canada to pursue intellectual goals. Embedded in this movement from the formerly colonized spaces into the West is the vexed question of dislocation and displacement for these intellectual subjects. *The Postcolonial Citizen* traces how such modes of (un)belonging are represented within literary and cultural space and how migrancy, and in particular the postcolonial «intellectual» migrant, is symbolically and philosophically understood as a cultural icon of displacement in the West. Using literary texts, autobiographical narrative of displacement, and cultural criticism, this book treats the cultural reception of intellectual migrancy (particularly within America) as both an uneasy and ambiguous condition. What is timely about this book's treatment of migrancy is the current threat imposed on postcolonial writers and scholars in the United States post-9/11. The book examines and exposes the consequences of intellectually intervening into democratic ideals after the rise of the «national security state» - giving the migrant sensibility of dislocation a socio-political dimension. Thus, in dealing with the cultural reception of migrancy, *The Postcolonial Citizen* clearly marks the shift between pre- and post-9/11 migrant subjectivity and particularly addresses how the «third world» intellectual migrant has become synonymous with the voice of dissent and threat to the established democratic order in the United States.
