COMETS!: Visitors from Deep Space: Amazon.co.uk: Foreword---

Comets -- visitors from deep space. Asteroids are not the only smaller bodies found in the Solar System. Another major class of such objects is comets. These regularly travel through our cosmic neighbourhood, and very occasionally become bright enough to be spectacular. One of the finest comets of recent years, Hale-Bopp, clearly showing the separate blue gas tail and the reddish dust tail.

Comets!:-Visitors from Deep Space by David J. Eicher

In " Comets: Visitors from Deep Space, " David Eicher provides a compelling introduction to these mysterious objects. Their history and effect on human culture from early times when a comet was frequently believed to be a message from the gods, most often predicting a negative event such as war, disease, famine, or the death of a king, to the present when we still look up at the sky in wonder.
