primitives. Such a time-sequence diagram provides information about the ordering of the different primitives, but the distance between two primitives does not represent a precise amount of time. Host A Physical link Host B DATA.req(0) 0 DATA.ind(0)

Computer Networking: Principles, Protocols and Practice

How to Set Up a Home Network-Beginners Guide. Today almost every home and small office has a local network, and an Internet connection. The home office network

enables multiple devices e.g. PCs,tablets etc to connect to each other, and also to connect to the internet. In this tutorial you will learn how you to build and setup a home or small office network and connect it to the Internet.

How to Set Up a

Home Network-
Beginners Guide
Computer Network is
basically a digital
telecommunications
network which permits
the nodes to allocate
resources. A
computer network
should be a set of two
or more than two
computers, printers &
nodes that will
transmit or receive

data through wired media like copper cable or optic cable or wireless media like WiFi. The best Example of a computer network is the Internet.
