more to be able to navigate sensibly the global scenario of complexity. Metaphorical thinking is a method which releases creative impulses into every change process and is of practical use, activating collective knowledge as a new network resource at the same time. This book reflects modern economy, ecology, sustainability and perception from an artistic perspective. However, it is not so much about "art", but rather how the modern artist takes on a serving role in the social arena again. He makes his creative knowledge available to connect processes of large-scale social development, he extends the boundaries of our scientifically limited world view and creates inspired playgrounds where the sensory-visionary can freely interact with the technically-necessary. This is no new aesthetic theory but rather a practical application of the creative process in operation at the crossroads of social interaction. Metaphorical thinking is emotionalized thinking and the observer is not separated from reality, but the centre, the starting point, of every change and new development. This volume offers creative ways to find solutions for a wide range of complex problems. It is a practical instrument for modern leadership and can be used to teach complexity in new ways. This work will help to create a global dialogue for sustainable change. This book is also available in German: ISBN 978-90-481-9678-4

The purpose of this book is to oppose the up-and-coming phenomenon of "weak thought." It is a passionate plea for a new Age of Enlightenment.

This book succeeds in presenting both an easily accessible outline of quantum physics and also an appreciation of mysticism beyond vagueness and obscurity. From here it describes the physical and mental movements of qigong as a way of integrating body and mind, head and heart, detailing

specific exercises and outlining their rationale and effects.

Fritjof Capra, der bereits mit seinen Weltbestsellern *Wendezeit* und *Das Tao der Physik* den Blick seiner Leser für verborgene Zusammenhänge geschärft hat, versucht mit seinem neuen Buch ein weiteres Mal, uns die Augen für die wissenschaftlichen Erkenntnisse zu öffnen, die nach seinem Dafürhalten den Schlüssel für eine erfolgreiche gesellschaftliche Entwicklung bereithalten. Auch diesmal hat er seinen Parcours wieder sehr weit abgesteckt und breitet ein weiteres Mal eine unendliche Fülle an Material vor uns aus. Auf dem neuesten Stand der wissenschaftlichen Forschung der unterschiedlichsten Disziplinen -- freilich nicht immer einverstanden mit dem in diesen Wissenschaften vertretenen Mainstream -- zeigt der Physiker überraschende Parallelen und Zusammenhänge auf, die die Quintessenz seines Denkens belegen: dass nämlich alles mit allem auf irgendeine, aber bestimmte und bestimmbare Weise zusammenhängt. Verbunden ist dies alles mit der Aufforderung, man möge in Zukunft endlich die gebührende Aufmerksamkeit auf diese Zusammenhänge -- die "Netzwerke des Lebens"--Richten. Diese nämlich gelte es zu beachten, wenn wir unser Überleben sichern und unsere Zukunft im Einklang mit der Natur gestalten wollten. Dies alles hat uns Capra bereits in *Wendezeit* als das Fazit der modernen Physik präsentiert. Doch wer *Wendezeit* nicht gelesen hat, der braucht diese Lektüre nun nicht mehr nachzuholen. Alles was man dort hätte lernen können, ist im neuen Capra ebenso enthalten, wie die Quintessenz auch der nachfolgenden Bücher. Beachtung verdient hat aber natürlich auch das eher wenige Neue: Im zweiten Teil des Buches nämlich, in dem sich der Autor den "Herausforderungen des 21. Jahrhunderts" stellt, streitet er für eine Neuausrichtung unserer wirtschaftlichen

Handlungsmaximen mit dem Ziel, dass das Wirtschaftssystem das Leben verbessert, statt es zu vernichten.

This book offers a corpus-based comparative study of an almost entirely unexplored set of multi-word lexical items serving pragmatic or text-structuring functions. Part One provides a descriptive account of multi-word discourse markers in written English, French and German, focussing on dicussion of interlingual equivalence. Part Two examines the use of multi-word markers by non-native speakers of English and discusses lexicographical and pedagogical implications.

LSIT is based on the scientific foundation of quantum physics. This deals with holistic structures and their interactions. The high dynamics of life is achieved by constantly changing relationships and opportunities, combined with a high gain of experience. This improves the adaptability and the chances of survival. Everything is subject to a higher meaning communicated to us about spiritual needs. We are spirit-driven beings who inhabit a body subject to electrodynamic laws. Each action requires information and energy, which we call up about our intentions. Diseases can be treated with medication. These transmit certain healing information. The LSIT uses this information directly, without need of pills. That's what makes them so efficient. It is capable of initiating healing processes even in advanced diseases. The author, Dr Bodo Koehler, MD, born in 1948, has more than 45 years of experience in the clinic and his own practice as an internist with extensive additional training. Since 1980 he has been one of the pioneers of bioenergetic measurement and therapy procedures. A lot of his developments are now standard in many practices. The author is a lecturer at home and abroad.
