What Is a Hydroponic Garden? Hydroponic gardens have been cultivated by humans for centuries. Aztec chinampas dating to ca. 1250 CE took advantage of high moisture areas where nutrient-rich soil was in short supply. In fact, any time you find a plant or weed in a crack in concrete, you have just witnessed a rudimentary form of hydroponic ...

How to Build a Hydroponic Garden
As a general rule, plants with shallow root systems do very well in hydroponic grow systems. Consider a hydroponic herb garden of dill, basil, oregano, cilantro, and/or parsley. Leafy greens are also great choices: Lettuce of all types, kale, chard, watercress, and spinach are all healthy, tasty, and easy to grow.

How to Build a Hydroponic Garden | Better Homes & Gardens
A growing medium is simply the material that supports the roots of the plant and keeps it upright. In traditional gardening, soil is the most common growing medium. In hydroponics, most inert substances (ie difficult to break down) can be used to host the roots. Common hydroponic mediums include Rockwool, perlite, gravel, sand and coconut fibre.
