Students learn the structure and function of the tissues, the skeletal system, the nervous system, the endocrine system, and muscle function from the level of the cell to the level of the organism. Take course.

Human Anatomy and Physiology I | Harvard University

Integration of anatomy and physiology coverage: anatomy and physiology are intimately related. Discussing form with function gives students the big picture. Text discussions provide structural details in the context of their functional significance, and, conversely, discuss complex physiology while referring to the anatomical features that play a part in each mechanism.
