An official publication of the Federal Aviation Administration, this is the ultimate technical manual for anyone who flies or wants to learn to fly a helicopter. If you're preparing for private, commercial, or flight instruction pilot certificates, it's more than essential reading—it's the best possible study guide available, and its information can be lifesaving. In authoritative and easy-to-understand language, here are explanations of general aerodynamics and the aerodynamics of flight, navigation, communication, flight controls, flight maneuvers, emergencies, and more. Also included is an extensive glossary of terms ensuring that even the most technical language can be easily understood. Helicopter Flying Handbook is an indispensable text for any pilot who wants to operate a helicopter safely in a range of conditions. Chapters cover a variety of subjects including helicopter components, weight and balance, basic flight maneuvers, advanced flight maneuvers, emergencies and hazards, aeronautical decision making, night operations, and many more. With full-color illustrations detailing every chapter, this is a one-of-a-kind resource for pilots and would-be pilots.

Technical manual for applicants who are preparing for their private, commercial, or flight instructor pilot certificates with a helicopter rating. Also could be aid in training students. Contains detailed coverage of helicopter aerodynamics, performance, and flight performance. Includes items such as weather, navigation, radio navigation, and communications. 81 charts and tables.

Provides technical assistance to applicants preparing for private, commercial, or flight instructor pilot certificates with a helicopter or gyroplane class rating.

Dated 30 July 2016. With binder and spine card. Supersedes November 2014 consolidation (ISBN 9780117928824)

This series of textbooks and supplements for pilots, student pilots, aviation instructors, and aviation specialists provides information on every topic needed to qualify for and excel in the field of aviation. Most FAA Knowledge Exams' questions are taken directly from the information presented in these texts. Written for applicants preparing for the private, commercial, or flight instructor certificate with a helicopter or gyroplane class rating, this guide covers both aeronautical knowledge and skill for operating rotorcraft vehicles. It is also a valuable tool for flight instructors as a teaching aid. This is the Basic Helicopter Handbook (Advisory Circular 61-13B) updated and renamed. This is FAA handbook FAA-H-8083-21.
