Constructivism is an approach to education that seeks to construct knowledge through experience. This is loosely based on the philosophy of constructivism that states that objective reality doesn't exist such that all knowledge is a human construct. The following are illustrative examples of constructivism in education.

updated for today's diverse teaching force and student populations, explores the benefits of sociomoral practices in the classroom. The authors draw on recent research to show how these approaches work with children ages 2-8. They focus on how to establish and maintain a classroom environment that fosters children's intellectual, social, moral, emotional, and personality development. Extending the work of Jean Piaget, the authors advocate for a cooperative approach that contrasts with the coercion and unnecessary control that can be seen in many classrooms serving
