### Iatrogenic Carcinogenesis

In a wider sense iatrogenic carcinogenesis means the induction of cancer by medical treatment. Some drugs have been now identified to be carcinogenic not only in experimental animals but also in man. For example, chlornaphazine used in the treatment of polycythemia has been proved to induce bladder cancer in 30% of the patients treated.

### Iatrogenic Carcinogenesis

Iatrogenesis is the causation of a disease, a harmful complication, or other ill effect by any medical activity, including diagnosis, intervention, error, or negligence. First used in this sense in 1924, the term was introduced to sociology in 1976 by Ivan Illich, alleging that industrialized societies impair quality of life by overmedicalizing life. Iatrogenesis may thus include mental suffering via medical beliefs or a practitioner's statements. Some iatrogenic events are obvious, like amputat
