Based on a study using online ethnography as the major research method, this book explains why and how men in Hong Kong use QQ(an online instant messenger)to "chase" women in mainland China, especially in the neighboring city of Shenzhen. Chasing women through QQ is a reciprocal exchange process during which the resources to be exchanged in the interaction are not negotiated. Rather, the men provide resources to the women, hoping for rewards in return that are not guaranteed. This characteristic of the exchange makes men who chase women through QQ very strategic in their action. They try to maximize the rewards and minimize the costs by adopting myriad strategies, such as constructing an attractive online identity by strategic self-presentation. The role of emotions in the exchange process is also examined. Men learn the emotional norms through the online forum, but sometimes it is difficult for them to control their emotions; some men fall in love when they are not supposed to. As it happens, they have failed to calculate the costs and rewards rationally in that they may provide too many resources to the women without getting enough rewards in return. This book provides original insights into the thought processes, motivations, desires, anxieties and risks of Hong Kong men seeking short-term sexual relations with women on the mainland. These insights are highly relevant to our understanding of the quickly evolving use of social media, a phenomenon of worldwide importance and deep implications.

The papers in this volume were presented at an international conference organised in Athens (May 11-14, 2004) and focus on the study of the Panathenaic Games, a Panhellenic athletic event that lasted for nearly a millennium. An international assembly of archaeologists, art historians, ancient historians, epigraphists and classical scholars contributed to the discussion of the origins and the historical development of the Panathenaic Games in general and of individual contests in particular. The role of royal and other patrons in the Hellenistic and Roman periods, as well as the form and meaning of victory dedications and other monuments generated by the games were also examined, making this a truly interdisciplinary study into this fascinating event. Two papers are in Greek. "This handsomely-illustrated conference volume is the first to concentrate exclusively on the games." Jackson, Journal of Hellenic Studies "A handsome, well-illustrated, large-format volume of the proceeding, mostly in English, of a conference held in Athens in 2004 in connection with the modern Olympics." - Tsetskhladze, Ancient West & East

Make direct vocabulary instruction fun and successful with this simple, straightforward, and easy-to-use book. Each game identifies the appropriate grade level and subject area, as well as whether or not the students should already be familiar with the vocabulary.

How one man brought the Olympics to Los Angeles, fueling the city's urban transformation. Dreamers and Schemers chronicles how Los Angeles's pursuit and staging of the 1932 Olympic Games during the depths of the Great Depression helped fuel the city's transformation from a seedy frontier village to a world-famous metropolis. Leading that pursuit was the "Prince of Realtors," William May (Billy) Garland, a prominent figure in early Los Angeles. In important respects, the story of Billy Garland is the story of Los Angeles. After arriving in Southern California in 1890, he and his allies drove much of the city's historic expansion in the first two decades of the twentieth century. Then, from 1920 to 1932, he directed the city's bid for the 1932 Olympic Games. Garland's quest to host the Olympics provides an unusually revealing window onto a particular time, place, and way of life. Reconstructing the narrative from Garland's visionary notion to its consequential aftermath, Barry Siegel shows how one man's grit and imagination made California history.

Ten Strategies of a World-Class Cyber Security Operations Center conveys MITRE's accumulated expertise on enterprise-grade computer network defense. It covers ten key qualities of leading Cyber Security Operations Centers (CSOCs), ranging from their structure and organization, to processes that best enable smooth operations, to approaches that extract maximum value from key CSOC technology investments. This book offers perspective and context for key decision points in structuring a CSOC, such as what capabilities to offer, how to architect large-scale data collection and analysis, and how to prepare the CSOC team for agile, threat-based response. If you manage, work in, or are standing up a CSOC, this book is for you. It is also available on MITRE's website, www.mitre.org.

"Whenever the people are well informed," Thomas Jefferson wrote, "they can be trusted with their own government." But what happens in a world dominated by complex science? Are the people still well-enough informed to be trusted with their own government? And with less than 2 percent of Congress with any professional background in science, how can our government be trusted to lead us in the right direction? Will the media save us? Don't count on it. In early 2008, of the 2,975 questions asked the candidates for president just six mentioned the words "global warming" or "climate change," the greatest policy challenge facing America. To put that in perspective, three questions mentioned UFOs. Today the world's major unsolved challenges all revolve around science. By the 2012 election cycle, at a time when science is influencing every aspect of modern life, antiscience views from climate-change denial to creationism to vaccine refusal have become mainstream. Faced with the daunting challenges of an environment under siege, an exploding population, a falling economy and an education system slipping behind, our elected leaders are hard at work ... passing resolutions that say climate change is not real and astrology can control the weather. Shawn Lawrence Otto has written a behind-the-scenes look at how the government, our politics, and the media prevent us from finding the real solutions we need. Fool Me Twice is the clever, outraged, and frightening account of America's relationship with science—a relationship that is on the rocks at the very time we need it most.

In this third edition of their best-selling classic, authors LeeBolman and Terrence Deal explain the powerful tool of "reframing."The authors have distilled the organizational literature into acomprehensive approach for looking at situations from more than oneangle. Their four frames view organizations as factories, families,jungles, and theaters or temples: The Structural Frame: how to organize and structuregroups and teams to get results The Human Resource Frame: how to tailor organizations tosatisfy human needs, improve human resource management, and buildpositive interpersonal and group dynamics The Political Frame: how to cope with power andconflict, build coalitions, hone political skills, and deal withinternal and external politics The Symbolic Frame: how to shape a culture that givespurpose and meaning to work, stage organizational drama forinternal and external audiences, and build team spirit throughritual, ceremony, and story
