John Pawson - Design Museum

When I see a space cluttered with things, it sends my brain into overdrive. I am a true believer that in order to work productively in an office environment, less is more. The less 'stuff' you have, the more you can concentrate on getting the job done. I took out a cash loan and decided to redo my own home office space. Results. The results were incredible - the minimalist look really worked ...

John Pawson is an architect and designer whose exceptional work combines an essential simplicity with a keen attention to the details of everyday life and human experience. His pared-down yet luxurious houses and art galleries were his first projects to gain international attention, and his work has since included Calvin Klein's flagship store in New York, airport lounges for Cathay Pacific, and a kitchen for Obumex. In the last decade, the scope of his designs has broadened from objects and interiors to include houses, monasteries, pavilions and boats. This change in scale has given his office the opportunity to refine its minimalist aesthetic and further develop its ideas of a fundamental architecture based on the qualities of space, proportion, light and materials. Frequently these projects intervene in existing conditions to create spaces that are simultaneously simple and complex, timeless and contemporary: in the Novy Dvur Monastery in the Czech Republic, elements of the original baroque complex are combined with entirely new architecture to create a mysterious and beautiful sequence of spaces, and in the Baron House in Sweden the vernacular language of the area is refined and abstracted to create a truly modern home. In Plain Space, author Alison Morris presents both this recent body of work and earlier projects from the perspective of someone who has had unique access to the work and archives of the office. In thematic essays and narrative project descriptions she examines the firm's working processes, relationship with clients, and approach to design. These insights into how Pawson and his office approach all different kinds of projects, including a cricket pavilion, a ballet stage set, apartment and boat interiors, will be of interest to architects, students, and anyone looking to simplify and beautify their own living space. Filled with exquisite photographs and detailed drawings, Plain Space will be the next must-have book for fans of John Pawson and a perfect introduction to his work for anyone interested in the absolute best of contemporary design.

A powerful new monograph showcasing the defining elements and architectural anatomy at the very heart of Pawson's work. This monograph, the latest volume in Phaidon's documentation of John Pawson's stellar career, hones in on the essential details that mark his distinctive architectural and aesthetic style. It groups a selection of his recent works into domestic projects, including his own house in rural England; extended sacred spaces; and repurposed structures, such as London's Design Museum. Throughout its pages, this book explores Pawson's unique approach to proportion and light and

his precise language of windows, doors, and walls.

John Pawson's career as an architect and designer spans a variety of sizes and programs: from bowls to bridges, and monasteries to Calvin Klein stores. In addition to his acclaimed design work, he is the author of Phaidon's successful *Minimum*, a book that paired images and captions to illustrate the notion of simplicity in a beautiful and inspirational manner. *Visual Inventory* presents some of the images from Pawson's personal collection of over 200,000 digital snapshots. The book opens with an essay explaining the importance of photography as a tool for Pawson's work, and the images are set one per page with illuminating captions. Covering a huge range of subjects, the photographs form a remarkable body of reference material. Some of the images illustrate a particular idea out form, material or space; others reflect the author's interest in returning repeatedly to certain subjects, capturing the changes brought by different weather, light conditions, seasons and patterns of use. Each image has been chosen for the book because it is useful, offering a lesson in visual thinking. None of the photographs in the book have been cropped or altered; it is the selection, arrangement and captioning of the images that make this book unique, valuable and attractive to any architect, designer, artist or student who wants to see the world around them with a stronger eye.

A thematic overview of the work of British architect John Pawson, known for his pure and harmonious interiors.

Photographer Fi McGhee's record of the conversion of a Dutch barn in Essex by architect John Pawson. A five year project which incorporated 18th century solidity with 21st century design.

The highly sought-after bible of the Minimalist aesthetic.

Globally acclaimed minimalist architect, John Pawson, celebrates colors through 320 inspiring photographs. "Pawson is a lot more than just an architect; he's also handy with a camera and has a good eye for what makes a nice picture." —*Monocle*
Globally acclaimed architectural designer John Pawson takes you on a multi-colored journey across the world through a carefully curated sequence of 320 images, a celebration of color from one of the most unexpected sources. His architecture might be known for its limited color palette – primarily white – but his photographs tell another story. Pawson is always taking photographs of patterns, details, textures, and spatial arrangements that often inform his work, which includes the new Design Museum in London and Calvin Klein retail stores.

John Pawson is the foremost proponent of minimalism in architecture and design. Already known to designers for his austere yet luxurious interiors, he has attained public acclaim for his high-profile retail projects such as the Calvin Klein flagship store in New York, his celebrity clients like Martha Stewart as his book "Minimum".; This book features ten of Pawson's projects, each one treated as a case study of the design process as experienced by architect, client and critic.; The author seeks to make the emotional and artistic content of John Pawson's work explicit through a close examination of a range of different projects. Sudjic's text, aided by specially-commissioned pictures, traces the design process, the architect's working methods and his philosophical approach. Sudjic considers the interaction between architect and client, the way in which design is influenced by the processes of construction and making, and explores the nature and significance of the finished scheme. This book is a record of John Pawson's developing approach to design and his unique position at the meeting

A long-awaited second cookbook from celebrated architectural designer John Pawson and his wife Catherine

Living and Eating is above all a cookery book, packed with 'luscious recipes' (*Marie Claire*), with food that has been selected to be simple and delicious. The intention is to narrow the gap between how we eat on a daily basis and how we entertain, recognizing that the most relaxed form of entertaining is simply about inviting people to join you at your table. The collection of recipes is designed to cater for all seasons and occasions, and gives attention to making the best ever version of everyone's favourites: there are recipes for roast chicken, the definitive tomato salad, tagliatelle alla carbonara, apple tart and summer pudding. The book goes beyond the food itself to look at the whole context in which we enjoy it - the plates and glasses we eat and drink from, the equipment we use to prepare the food and the kitchen in which we cook. Exquisitely designed and produced, and illustrated with stunning food photography and photographs of John Pawson's London house, *Living and Eating* is an unparalleled, much praised guide to a simple yet utterly seductive way of cooking, eating and living.
