Mannahatta: A Natural History of New York City is the astounding result of those efforts, reconstructing, in words and images, the wild isla. On September 12, 1609, Henry Hudson first set eyes on the land that would become Manhattan. It's difficult for us to imagine what he saw, but for more than a decade, landscape ecologist Eric Sanderson has been working to do just that.

In his new book *Mannahatta: A Natural History of New York City*, ecologist Eric W. Sanderson of the Wildlife Conservation Society considers what Manhattan was like a short 400 years ago, before the first settlers arrived. The design for the book helps make this serious scientific history accessible and emphasizes the startling contrast between the metropolis of today with the Manhattan Island of 1609.

Mannahatta: A Natural History of New York City is the astounding result of those efforts, reconstructing in words and images the wild island that millions now call home. By geographically matching an 18th-century map with one of the modern city, examining volumes of historic documents, and collecting and analyzing scientific data, Sanderson re-creates the forests of Times Square, the meadows of Harlem, and the wetlands of downtown.
