In the specific case of the Solar T-62T-32, it is mandatory to check the return spring of the torque motor for condition and especially corrosion during EVERY pre-flight check. As long as this spring is intact as well as the torque motor itself (including the wires), the system is a very safe and reliable, configuration. 4.

The Solar T62T-32 turboshaft is a compact single shaft turboshaft with an integrated output reduction and accessory gearbox. It is very similar to the Solar T41 in general layout although the performance is much improved. Air is drawn in through the screened radial engine inlet, between the gas turbine assembly and the gearbox housing.
