Every story has a beginning. Discover how Marinette and Adrien, two high school students practically like everyone else, became Ladybug and Cat Noir, and why Hawk Moth is their sworn enemy. This is the PERFECT jumping on point for new readers! Based on the Animated Series by Zag Entertainment Adapted by Cheryl Black and Nicole D'Andria

Join Ladybug and Cat Noir as they save the day in a full-color, action-packed chapter book series based on Miraculous: Tales of Ladybug and Cat Noir. It's the first day of school and Marinette is dreading going back to class and seeing Chloé, the girl who bullies her. Meanwhile, Adrien, a famous model, wishes he could go to school like every other teenager, but his overprotective father refuses to let him! When the two receive mysterious Miraculouses, magical jewels that give them super powers, it turns their worlds upside down. Adrien is thrilled to transform into Cat Noir and get the freedom he craves, but Marinette struggles with becoming Ladybug; she lacks confidence and doesn't feel worthy of her powers. Can the two learn to work as a team and build Marinette's confidence when supervillain Hawk Moth sends a rock-solid foe named Stone Heart to destroy Paris? This study illustrates why the language of the Qur'an is miraculous, unique, and evidence of divine authority. The author compares the language of the Qur'an with the language of pre-Islamic poetry, the Prophet's words (hadith), and the language of the Arabs both past and present, to demonstrate that although the Qur'an was revealed in Arabic it was at the same time an Arabic which was entirely new. Original and early Muslim audiences viewed this as miraculous and responded to the Qur'an's words, sounds, rhythms, etc. in a manner consistent with a deeper appreciation of its beauty and majesty which modern ears, trained by familiarity, and despite being surrounded by all manner of dictionaries and studies, are at a loss to capture. The author attempts to remove this veil and present the Qur'an to readers as if hearing it for the first time, to bring to life some of this wonder. In doing so he guides readers to appreciate the beauty of the Qur'an, to become more immersed in it, and to have a clearer understanding of its structure and flow. Devoting special attention to Surah Al Muddaththir, to underpin his analysis, Saeh thus brings the Revelation to life, to demonstrate that each surah has distinct features and characteristics that make it stand out uniquely within the design and sweep of the whole.

Collects Miraculous #10-12 of the comic book series.

Celebrate Christmas with Marinette and Adrien in this festive leveled reader based on Miraculous: Tales of Ladybug & Cat Noir, as seen on Disney! Includes a bonus sheet of stickers! Cat Noir and Ladybug team up to face off against the Trash Krakken in New York City.

This book offers an authoritative and accessible introduction to the New Testament and other early Christian literature for anyone interested in the Bible or the origins of Christianity. Designed primarily for undergraduate courses, it provides a balanced, critical overview of the history, literature, and religious diversity of Early Christianity.

Charles Darwin's Origin of Species is one of the most widely cited books in modern science. Yet tackling this classic can be daunting for students and general readers alike because of Darwin's Victorian prose and the complexity and scope of his ideas. The "Origin" Then and Now is a unique guide to Darwin's masterwork, making it accessible to a much wider audience by deconstructing and reorganizing the Origin in a way that allows for a clear explanation of its key concepts. The Origin is examined within the historical context in which it was written, and modern examples are used to reveal how this work remains a relevant and living document for today. In this eye-opening and accessible guide, David Reznick shows how many peculiarities of the Origin can be explained by the state of science in 1859, helping readers to grasp the true scope of Darwin's departure from the mainstream thinking of his day. He reconciles Darwin's concept of species with our current concept, which has advanced in important ways since Darwin first wrote the Origin, and he demonstrates why Darwin's theory unifies the biological sciences under a single conceptual framework much as Newton did for physics. Drawing liberally from the facsimile of the first edition of the Origin, Reznick enables readers to follow along as Darwin develops his ideas. The "Origin" Then and Now is an indispensable primer for anyone seeking to understand Darwin's Origin of Species and the ways it has shaped the modern study of evolution.
