Ninety Percent of Everything: Inside shipping, the invisible industry that puts clothes on your back, gas in your car and food on your plate. A book about shipping, transportation, oceans, labour rights, the sea.

Ninety Percent of Everything | Rose George

Sturgeon's law, is an adage that states that "ninety percent of everything is crap." The adage was coined by Theodore Sturgeon, an American science fiction author and critic. The adage was inspired by Sturgeon's observation that while science fiction was often derided for its low quality by critics, the majority of examples of works in other fields could equally be seen to be of low quality, and science fiction was thus no different in that regard from other art. Some make a distinction between

Revealing the workings and dangers of freight shipping, which is the key to our economy, environment and civilization, the author sails from Rotterdam to Suez to Singapore to present an eye-opening glimpse into an overlooked world filled with suspect practices, dubious operators and pirates.

On ship-tracking Web sites, the waters are black with dots. Each dot is a ship; each ship is laden with boxes; each box is laden with goods. In postindustrial economies, we no longer produce but buy, and so we must ship. Without shipping there would be no clothes, food, paper, or fuel. Without all those dots, the world would not work. Yet freight shipping is all but invisible. Away from public scrutiny, it reveals in suspect practices, dubious operators, and a shady system of “flags of convenience.” And then there are the pirates. Rose George, acclaimed chronicler of what we would rather ignore, sails from Rotterdam to Suez to Singapore on ships the length of football fields and the height of Niagara Falls; she patrols the Indian Ocean with an anti-piracy task force; she joins seafaring chaplains, and investigates the harm that ships inflict on endangered whales. Sharply informative and entertaining, *Ninety Percent of Everything* reveals the workings and perils of an unseen world that holds the key to our economy, our environment, and our very civilization.

Eye-opening and compelling, the overlooked world of freight shipping, revealed as the foundation of our civilization On ship-tracking websites, the waters are black with dots. Each dot is a ship; each ship is laden with boxes; each box is laden with goods. In postindustrial economies, we no longer produce but buy. We buy, so we must ship. Without shipping there would be no clothes, food, paper, or fuel. Without all those dots, the world would not work. Freight shipping has been no less revolutionary than the printing press or the Internet, yet it is all but invisible. Away from public scrutiny, shipping revels in suspect practices, dubious operators, and a shady system of “flags of convenience.” Infesting our waters, poisoning our air, and a prime culprit of acoustic pollution, shipping is environmentally indefensible. And then there are the pirates. Rose George, acclaimed chronicler of what we would rather ignore, sails from Rotterdam to Suez to Singapore on ships the length of football fields and the height of Niagara Falls; she patrols the Indian Ocean with an anti-piracy task force; she joins seafaring chaplains, and investigates the harm that ships inflict on endangered whales. Sharply informative and entertaining, *Ninety Percent of Everything* reveals the workings and perils of an unseen world that holds the key to our economy, our environment, and our very civilization.

There are 100,000 freighters on the seas. Between them they carry nearly everything we eat, wear and work with. In this unique investigation, Rose George joins the crew of a container ship to chart the murky waters of international shipping, with its powerful naval fleets, pirate gangs, and illegal floating factories, to reveal the hidden industry upon which our world turns and our future depends.

An eye-opening exploration of blood, the lifegiving substance with the power of taboo, the value of diamonds and the promise of breakthrough science Blood carries life, yet the sight of it makes people faint. It is a waste product and a commodity pricier than oil. It can save lives and transmit deadly infections. Each one of us has roughly nine pints of it, yet many don't even know their own blood type. And for all its ubiquitousness, the few tablespoons of blood discharged by 800 million women are still regarded as taboo: menstruation is perhaps the single most demonized biological event. Rose George, author of *The Big Necessity*, is renowned for her intrepid work on topics that are invisible but vitally important. In *Nine Pints*, she takes us from ancient practices of bloodletting to the breakthrough of the “liquid biopsy,” which promises to diagnose cancer and other diseases with a simple blood test. She introduces Janet Vaughan, who set up the world's first system of mass blood donation during the Blitz, and Arunachalam Muruganatham, known as “Menstrual Man” for his work on sanitary pads for developing countries. She probes the lucrative business of plasma transfusions, in which the US is known as the “OPEC of plasma.” And she looks to the future, as researchers seek to bring synthetic blood to a hospital near you. Spanning science and politics, stories and global epidemics, *Nine Pints* reveals our life's blood in an entirely new light. *Nine Pints* was named one of Bill Gates recommended summer reading titles for 2019.

Former Major League pitcher and mental skills coach for two of baseball's legendary franchises (the Boston Red Sox and San Francisco Giants) Bob Tewksbury takes fans inside the psychology of baseball. In *Ninety Percent Mental*, Bob Tewksbury shows readers a side of the game only he can provide, given his singular background as both a longtime MLB pitcher and a mental skills coach for two of the sport's most fabled franchises, the Boston Red Sox and San Francisco Giants. Fans watching the game on television or even at the stadium don't have access to the mind games a pitcher must play in order to get through an at-bat, an inning, a game. Tewksbury explores the fascinating psychology behind baseball, such as how players use techniques of imagery, self-awareness, and strategic thinking to maximize performance, and how a pitcher's strategy changes throughout a game. He also offers an in-depth look into some of baseball's most monumental moments and intimate anecdotes from a "who's who" of the game, including legendary players who Tewksbury played with and against (such as Mark McGwire, Craig Biggio, and Greg Maddux), game-changing managers and executives (Joe Torre, Bruce Bochy, Brian Sabean), and current star players (Jon Lester, Anthony Rizzo, Andrew Miller, Rich Hill). With Tewksbury's esoteric knowledge as a thinking-fan's player and his expertise as a "baseball whisperer", this entertaining book is perfect for any fan who wants to see the game in a way he or she has never seen it before. *Ninety Percent Mental* will deliver an unprecedented look at the mound games and mind games of Major League Baseball.

Fifty years ago-on April 26, 1956-the freighter *Ideal X* steamed from Berth 26 in Port Newark, New Jersey. Flying the flag of the Pan-Atlantic Steamship Company, she set out for Houston with an unusual cargo: 58 trailer trucks lashed to her top deck.But they weren't trucks-they were steel containers removed from their running gear, waiting to be lifted onto empty truck beds when *Ideal X* reached Texas. She docked safely, and a revolution was launched-not only in shipping, but in the way the world trades. Today, the more than 200 million containers shipped every year are the lifeblood of the new global economy. They sit stacked on thousands of box boatsthat grow more massive every year. In this fascinating book, transportation expert Brian Cudahy provides a vivid, fast-paced account of the container-ship revolution-from the maiden voyage of the *Ideal X* to the entrepreneurial vision and technological breakthroughs that make it possible to ship more goods more cheaply than ever before.Cudahy tells this complex story easily, starting with Malcom McLean, Pan-Atlantic's owner who first thought about loading his trucks on board. His line grew into the container giant Sea-Land Services, and Cudahy chartsits dramatic evolution into Maersk Sealand, the largest container line in the world. Along the way, he provides a concise, colorful history of world shipping-from freighter types to the fortunes of steamship lines-and explores the spectacular growth of global trade fueled by the mammoth ships and new seaborne lifelines connecting Asia, Europe, and the Americas.Masterful maritime history, *Box Boats* shows how fleets of these ungainly ships make the modern world possible-with both positive and negative effects. It's also a tale of an historic home port, New York, where old piers lie silent while 40-foot steel boxes of toys and televisions come ashore by the thousands, across the bay in New Jersey.

"One smart book . . . delving deep into the history and implications of a daily act that dare not speak its name." —Newsweek Acclaimed as "extraordinary" (*The New York Times*) and "a classic" (*Los Angeles Times*), *The Big Necessity* is on its way to removing the taboo on bodily waste—something common to all and as natural as breathing. We prefer not to talk about it, but we should—even those of us who take care of our business in pristine, sanitary conditions. Disease spread by waste kills more people worldwide every year than any other single cause of death. Even in America, nearly two million people have no access to an indoor toilet. Yet the subject remains unmentionable. Moving from the underground sewers of Paris, London, and New York (an infrastructure disaster waiting to happen) to an Indian slum where ten toilets are shared by 60,000 people, *The Big Necessity* breaks the silence, revealing everything that matters about how people do—and don't—deal with their own waste. With razor-sharp wit and crusading urgency, mixing levity with gravity, Rose George has turned the subject we like to avoid into a cause with the most serious of consequences.

A beautifully designed guidebook to the unnoticed yet essential elements of our cities, from the creators of the wildly popular 99% Invisible podcast

New York Times Bestseller • New York Times Notable Book 2014 • Winner of the Royal Society Winton Prize for Science Books “A thrilling account of the modern material world.” —Wall Street Journal *Miodownik*, a materials scientist, explains the history and science behind things such as paper, glass, chocolate, and concrete with an infectious enthusiasm. “—Scientific American Why is glass see-through? What makes elastic stretchy? Why does any material look and behave the way it does? These are the sorts of questions that renowned materials scientist Mark Miodownik constantly asks himself. Miodownik studies objects as ordinary as an envelope and as unexpected as concrete cloth, uncovering the fascinating secrets that hold together our physical world. In *Stuff Matters*, Miodownik explores the materials he encounters in a typical morning, from the steel in his razor to the foam in his sneakers. Full of enthralling tales of the miracles of engineering that permeate our lives, *Stuff Matters* will make you see stuff in a whole new way. "Stuff Matters is about hidden wonders, the astonishing properties of materials we think boring, banal, and unworthy of attention...It's possible this science and these stories have been told elsewhere, but like the best chocolatiers, Miodownik gets the blend right." —New York Times Book Review
