*Cheating Lessons* is a guide to tackling academic dishonesty at its roots. James Lang analyzes the features of course design and classroom practice that create cheating opportunities, and empowers teachers to build more effective learning environments. Instructors who curb academic dishonesty become better educators in other ways as well.

The trading, selling, and buying of personal transport has changed little over the past one hundred years. Whether horse trading in the early twentieth century or car buying today, haggling over prices has been the common practice of buyers and sellers alike. *Horse Trading in the Age of Cars* offers a fascinating study of the process of buying an automobile in a historical and gendered context. Steven M. Gelber convincingly demonstrates that the combative and frequently dishonest culture of the showroom floor is a historical artifact whose origins lie in the history of horse trading. Bartering and bargaining were the norm in this predominantly male transaction, with both buyers and sellers staking their reputations and pride on their ability to negotiate the better deal. Gelber comments on this point-of-sale behavior and what it reveals about American men. Gelber's highly readable and lively prose makes clear how this unique economic ritual survived into the industrial twentieth century, in the process adding a colorful and interesting chapter to the history of the automobile.

*Template-driven Consulting* is a book for managers who have long been searching for a way to cut costs on expensive external business advice. Every day, new stories of companies that encounter severe financial troubles show up on the front pages of newspapers across the globe. Cost-cutting is again the most pressing issue in organizations - initiating massive layoffs and large-scale reductions in spending on capital goods. This text allows your company to trim down expenses at another source: external consultants. By drawing on the use of templates, TDC at last brings about the often cited knowledge transfer from consultants to your employees. Applying TDC, your employees become the experts whilst you see the number of and cost for external consultants decrease tremendously! This book, with its clear structure and hands-on approach, lets you understand the new methodology and will help you in reaping its cost benefits.

**BEST SELLER** This **BEST SELLING** book provides a comprehensive guide to effective governance for board members and their senior executives. The author offers a new framework for understanding boards and proposes practices that boards can use to fulfill their stewardship responsibilities, strengthen board performance and improve organizational effectiveness. The book discusses the basics of governance - what it is and why it matters; essential duties and liabilities of the board and its members; and the essentials of an effective board/management partnership. It provides detailed guidance on the seven primary areas of board responsibility: i) mission and planning; ii) financial stewardship; iii) human resources stewardship; iv) performance monitoring and accountability; v) community representation and advocacy; vi) risk management; and, vii) managing 'critical events' and 'transitional phases'. It discusses the legal structure of nonprofits, who owns them and how to organize for accountable governance. *Governing for Results* will assist boards in dealing with recurring issues around board and committee structures; their terms of reference and effective use; and job descriptions for key officers. The discussion of board development, board management, decision-making and organizational culture will prove invaluable in helping many boards deal with these complex issues. A discussion of the essential principles of governing for results includes a logical framework for planning and evaluation. The book provides tools that can help boards decide which governance practices will best fit their particular organization and strengthen their performance as a governing body. It outlines the factors that may interfere with a board's ability to adopt appropriate governance practices and presents twelve keys to successful governance that were identified through research. It offers a sample letter of agreement for new board members, and samples of an agenda for board meetings, an oath of confidentiality, a values statement, conflict of interest and donor confidentiality policies, a template for financial monitoring, self-assessment tools for the board and individual directors and a basic guide to 'Rules of Order' for conduct of meetings. It also provides outlines for comprehensive by laws and governance policies, and references to additional resources. Although this book is intended to fill a gap in the resources available to volunteer members of nonprofit boards of directors, much of its guidance will also be useful for directors of public and private sector corporations. The strong research base

underpinning this work also makes it of interest to researchers, academics, and consultants. It adds perspective to the debate about governance models and offers guidance to board members with respect to board structure, responsibilities, governance practices, and problems that commonly afflict boards. It is designed as a user-friendly guide for busy directors and executives who want concise, compact and well-researched answers to perennially troubling questions about governance, the role of boards and their relationship to staff.

"This new curriculum standard for the Level 2 - General Machinist for the Machining and Tooling trades is based upon the on-the-job performance objectives, located in the industry approved training standard. The curriculum is organized into 8 reportable subjects. The Program Summary of Reportable Subjects chart summarizes the training hours for each reportable subject. The curriculum identifies only the learning that takes place off-the-job. The in-school program focuses primarily on the theoretical knowledge and the essential skills required to support the performance objectives of the Apprenticeship Training Standards. Employers/Sponsors are expected to extend the apprentice's knowledge and skills through practical training on the work site."--Document.

"What happens when we die has been one of humankind's most enduring questions. Evidence of the Afterlife and Predictions brings a new and exciting perspective to this ancient question. Donna Smith-Moncricieffe presents impressive original research of mediums and an excellent review of modern scientific afterlife research. This book is well written and enthusiastically recommended." —Jeffrey Long, M.D., author of the New York Times bestseller Evidence of the Afterlife: The Science of Near-Death Experiences "In an effort to learn whether our consciousness continues on after physical death, Donna Smith-Moncricieffe has been designing and conducting innovative research experiments. Donna's information will resonate with open-minded skeptics and 'left-brained' lay-persons, whether they are grieving or just curious about the nature of our existence." —Mark Ireland, author of Soul Shift: Finding Where the Dead Go "Donna's book is a responsible, unbiased examination of mediums and mediumship. This book shows that mediumship, like music or art, is a natural gift and when used responsibly, provides a greater understanding of this life and of life on the other side. Anyone new to this subject will learn much from this book. Well done!" —Rev. Sharon Golsby, Past President, Spiritualist Church of Canada

Building on students' enthusiasm for movies, this text is more successful than any other at motivating students to understand and analyze film. In the new Sixth Edition, author Dave Monahan has thoroughly revised the book for clarity and currency, while adding new interactive learning tools to support student learning. The best book and media package for introductory film just got better.
