The Soul and the Earth – creating, learning, and exploring for the love of the Soul and the Earth. journal.

## The Soul and the Earth – creating, learning, and exploring ...

The child is the keeper of your life force, it contains your roots to the Earth. The child is your connection to the Earth, and the intention is that a fusion, a union, take place within you between soul and child, Heaven and Earth. Sense whether you can now feel this: the child on your right side and your soul on your left side.

## The Interplay Between Soul and Earth – The Jeshua Channelings

The Earth is a conscious planet with its own destiny within the universe. Gaia, the Earth soul, is not capable of sustaining and preserving life if her life force and elemental consciousness, occurring in many landscapes and locations throughout the planet, are not free to breathe and function according to her design.

"The spirit and the body are the soul of man." Latter-day Saints believe that the soul is the union of a pre-existing, God-made spirit and a temporal body, which is formed by physical conception on earth.

Called to lead a spiritual awakening and ignite global consciousness, we are the channelers, healers and voices behind Blue Soul Earth™. Combining our gifts, we inspire and heal through events, workshops, content, spiritual travel, and teaching.

On Soul and Earth offers an original perspective on the relationship between the environment and the human psyche. Physical spaces contribute to the building of identity through personal experience and memory. Places evoke emotions and carry their own special meanings. Elena Liotta and her contributors also explore the neglected topics of migration and travel. The author has extensive clinical experience of working with patients from a wide variety of national and cultural backgrounds. Globalization is present in the clinical office as well as in the wider world and the transformations currently being wrought in the areas of cultural and national identity also impact on clinical work. This book will be of interest to Jungian analysts as well as psychotherapists and mental health professionals, especially those who are addressing transcultural and multicultural issues including voluntary or enforced migration. It will also appeal to urban planners, architects and those interested in environmental issues.

This exciting book—presented in full color—considers "climate," ultimately, to be an expression of the fundamental task of Gaia, the being of Earth. It expresses the relationship between the more inanimate and mechanized forces of the planet as a physical being and the more inward, biographically evolutionary journey of Earth as an ensouled being, embedded within the larger cosmic drama. The Earth is much more than rocks, water, gas, and heat. It is more than the combined forces in all of the living bodies it selflessly supports. The destiny of Earth as a being of cosmic import weaves intimately with humanity's destiny. At the center of this book is the

# Bookmark File PDF On Soul And Earth The Psychic Value Of Place

idea that the climate crisis is one shared by humanity and the Earth as part of our mutual evolution toward higher states of consciousness. Not only is Earth the source of our body, but the Earth also now depends on our efforts to shift our consciousness toward goals higher than self-satisfaction, entertainment, and consumption. Climate is the interface that displays the results of our efforts to attain higher consciousness for all of the cosmos to see and evaluate. In a technically sound, yet highly accessible, discussion of how our Earth's complex climate system works, Dennis Klocek takes the reader through various climate and weather patterns, using case studies of recent events, explaining terms and phenomena, all with the goal of helping us understand the Earth's soul, within which we live and develop as human beings. He describes and explains the earthly and extra-earthly forces behind weather patterns such as draughts, floods, and hurricanes, showing how larger patterns such as El Niño and El Niña develop and affect the complex systems that form weather events. In his surprising final chapter, "Moral Roots of the Climate Crisis," the author discusses the development of human science and consciousness. He contrasts, for example, the geometrical-metaphysical approach of Kepler to the emergence of the computational-mathematical brilliance of Isaac Newton, illustrating the ongoing split in approaches to the study of the natural world. An overly quantitative view of our world has led humankind mostly to dominate, subdue, and take from nature, categorizing our Earth as a numerical rock, permeated by forces completely beyond the control of, and sometimes at direct odds with, human soul activity.... We live on a planet that is alive and whose soul is composed of the tremendously vital sequences of climate patterns that unite all lands and all humans in one organism. From this cosmological perspective, it may be possible to imagine morally responsible scientific approaches to problem solving where human needs and the needs of the Earth as a living being interact in mutually harmonic ways. Climate is for anyone—meteorologists,

climatologists, and nonspecialists alike—who would like a deeper understanding our Earth's soul and the "whys" and "hows" of today's increasingly extreme weather patterns.

SOUL OF THE EARTH by Samuel A. Nigro, MD SOUL OF THE EARTH--by Samuel A. Nigro, MD is the accumulation of what was learned over 70 plus years of life, over 45 years of marriage, over 40 years as a psychiatrist, 3 years in the U.S. Navy Submarine Service, and as a first generation American with five children and ten grandchildren. The planet and mankind are amazing. To limit ourselves to behaviors as if there is nothing more, is contradicted by an accurate comprehensive understanding of the planet and the universe. Basically, love is superior to all and the universe is the entropy necessary for the expression of love. Love itself requires there to be more. Nothing more is a cruel joke that life and love are meaningless. All logic and reason demand there be more, and we should act as if there is even much more love in anticipation. And if there isnt, then there ought to be! Regardless, the world would be better by believing in such and acting as such. The book provides some articles but most of it is the way to live a transcendental life: organized matter sanctified and given a soul by identity, truth, oneness, good and beauty for everyones life, liberty, and pursuit of happiness partially the subtitle of the book. You get substance and the transcendental principles for living that save by actuality for a change. This is in contrast to the virtual reality culture of the unreliable manipulating self-discrediting noisy glitzy press&media imposed substanceless non-being which, by suggestibility, turns us into choiceless aliens instead of free persons for the planet. By the self-worshiping self-discrediting press&media, we are on the madman road-rage race to the bottom culture of pollution, disgust, death, and decline. Not by this book. Against vulgar suggestibility and glitz caused gullibility, this book gives real being by teaching six analogous ways of living the wisdom-filled eight categories of metaphors of love in the cone of space-time: As a

human particle by elementary physics event, spectrum, field, quantum, singularity, dimension, uncertainty, and force. As a human being by community universal dignity, unity, integrity, identity, spirituality, life, liberty, and pursuit of happiness. As a Catholic, Roman or otherwise, by the sacraments Baptism, Penance, Holy Communion, Extreme Unction, Holy Orders, Matrimony, and Grace. As a Christian by the virtues faith, hope, charity, prudence, justice, courage, temperance, and holiness. As a patient by the universal variables of all therapy living things are precious, selective ignoring, subdued spontaneity non-self excluded, affect assistance, detached warmth & gentleness, non-reactive listening, C2CC centered candidness, and peace & mercy. And as sanctified by the last words of the crucified Christ. Take your pick or combine them all. Except for the quantity, it is simple.

Thousands of aphorisms and concepts about every imaginable topic are offered to teach ancient secrets from nature and nature's God (to quote the Founding Fathers of America). The book SPIRITUALIZES our contemporary materialist culture by an audacious free-spirited sacramentalization of everything. Read it through once; then a few pages or a chapter daily; and problem-solve as needed by index and perusal. You will be better. The world will be better. You will learn to be a real human being for everyone. And you will have your soul back by embracing the universal Mass mantra: life-sacrifice-virtue-love humanity-peace-freedom-death.

With economies in peril, war in the Middle East, genocides, global warming, and a host of other grim phenomena, the world has never seemed so besieged. The solution, says Robert Sardello, lies with the individual. In this timely, thoughtful book, he explains how the soul can engage with the outer world to produce radical change. Because we think of the world as a vast mechanism and behave as mechanical objects in it, the results are devastation and dysfunction. The key is to learn to identify with the plight of the Earth by developing a true sense of individual imagination and conscious

# Bookmark File PDF On Soul And Earth The Psychic Value Of Place

awareness of inner purpose and beauty in conjunction with the soul of the world. Sardello shows how to achieve this awareness and bring what is inside out into the world, inspiring balance and stability. Using the Grail legend and the myth of Sophia—known as the Soul of the World—as well as writings by Jung, James Hillman, and Rudolf Steiner, *Love and the Soul* helps readers imagine a revitalized Earth by exploring the significance of grieving, the transformative power of radical receptivity, the creative power of dreaming, and a new basis for community.

Once upon no time there was a Little Soul . . . And this Little Soul wanted to understand forgiveness. Except the Little Soul didn't just want to understand forgiveness--the Little Soul wanted to experience forgiveness and know what it felt like to forgive another. So God helped in the best of all possible ways: by putting the Little Soul in the body of Meghan, a newborn baby just beginning to explore all the magic the world had to offer. But God never sends any Little Soul to Earth all alone. God sent along Melvin, a guardian angel, and a promise that God would always be there--even if the Little Soul forgot from time to time. Experience the world through the eyes of the Little Soul in her first few moments on Earth as Meghan meets her mommy and daddy, learns about love, and begins to figure out what it means--and how it feels--to be human. The Little Soul and the Earth is a delightful, vividly told and illustrated tale from the team that created *The Little Soul and the Sun*. The first of a new series of Little Soul adventures, it exemplifies the vital truth that God is with us always, no matter where our own adventures lead and no matter how many times we may forget that truth. Gently reminding us that beauty and love are all around, the world of the joyous Little Soul is a place your child will want to visit again and again.

A completely new review of the soul is now derived from a common inheritance of the ancient heritage and mysticism, as well as the

souls - Some of the characteristics and problems of medium developed souls - Some of the characteristics and problems of the highly developed souls - Some of the observations of the young, medium and the highly developed souls - Everyday life of Bringers of the dawn - Planets condition the organic world - Soul and karma - Soul and science - Soul and religion - Three kinds of work: physical, intellectual and intending - Work on oneself - Man's testimony of the presence of the Divine.

A leading spiritual teacher reveals how Celtic spirituality -listening to the sacred around us and inside us - can help us heal the earth, overcome our conflicts, and reconnect with ourselves.

Philosophy was invented by pagans. Yet this fact is almost always ignored by those who write the history of ideas. This book tells the history of the pagan philosophers, and the various places where their ideas appeared, from ancient times to the 21st century. The Pagan philosophers are a surprisingly diverse group: from kings of great empires to exiled lonely wanderers, from devout religious teachers to con artists, drug addicts, and social radicals. Three traditions of thought emerge from their work: Pantheism, NeoPlatonism, and Humanism, corresponding to the immensities of the Earth, the Gods, and the Soul. From ancient schools like the Stoics and the Druids, to modern feminists and deep ecologists, the pagan philosophers examined these three immensities with systematic critical reason, and sometimes with poetry and mystical vision. This book tells their story for the first time in one volume, and invites you to examine the immensities with them. And as a special feature, the book includes summaries of the ideas of leading modern pagan intellectuals, in their own words: Emma Restall Orr, Michael York, John Michael Greer, Vivianne Crowley, and more

Back to Earth is the powerful, personal journey of a man in his middle years who senses that he has drifted away from the ideals of

his youth and who must now search for coherence, belief, and a renewed spirituality following the breakup of his marriage and family. Living alone in a cabin in the woods, Temple searches his past and tells tales of experiences backpacking in Colorado, Dakota, New Mexico and Alaska. His reflections focus on the spiritual and redemptive qualities of nature, the American character, and the dilemmas of the split between matter and spirit, body and soul, God and creation. As an "earnest pilgrim with a short attention span", Temple's story chronicles his journey from an intimacy with the earth to an alienation from it, and the need of all humans to find a redemptive reunion. The book is a kind of pilgrimage as the author tries to get back home, to find God, to learn what our species once knew, and to rediscover the heart and soul of creation.

While never losing sight of the rational, cultured mind, Jung speaks for the natural mind, source of the evolutionary experience and accumulated wisdom of our species. Through his own example, Jung shows how healing our own living connection with Nature contributes to the whole.
