Samson/Daft/ Donnet's Fundamentals of Management is a robust foundation text providing a balance of broad, theoretical content with accessible language for students. This sixth edition features a new author on the team and contains updates to content based on recent research. Along with current management theory and practice, the text integrates coverage of innovation, entrepreneurship, agile workplaces, social media and new technology throughout. The book is rich with experiential exercises, self-assessment activities, challenges and cases for students to engage with,

developing multiple skills.

Examples within the text are both local and global, with a new focus on a 'skills approach', and each part of the text concludes with a contemporary continuing case study, focussing on car company, Toyota, as it faces managerial challenges and opportunities in the region The text covers the four key management functions: Planning, Organising, Leading, and Controlling, conveying to students the elements of a manager's working day.

'This is a feast for theologians, historians and Christian counselors. Pietsch examines 21 of Luther's "letters of comfort" to explore Luther's pastoral care for souls suffering with depression.

Pietsch uses interdisciplinary tools of inquiry artfully to examine the letters, Luther's pastoral care approaches and the history of the "melancholy tradition". The practice of seelsorge emerges as an amalgam of art, spiritual gift, and understanding of affliction, all resting comfortably within the authority of scripture and the Lutheran Confessions. Pietsch's volume is a significant contribution to spiritual care literature, underscoring the conviction of the early church that individual soul care is an essential response to serve those who despair. Offering pivotal pastoral care insights that are often lost, discredited or entirely absent in the work of caring for

in a view of women as a rich, yet underutilized knowledge and labor resource, a great deal of recent attention has focused on encouraging women to pursue education and careers in science — even in countries with longstanding dominant patriarchal regimes. Yet, overall, science remains an area in which girls and women are persistently disadvantaged. This book addresses that situation. It bridges the gap between individual- and societal-level perspectives on women in science in a search for systematic solutions to the challenge of building an inclusive and productive scientific workforce capable of creating the innovation needed for economic growth and

societal wellbeing. This book examines both the role of gender as an organizing principle of social life and the relative position of women scientists within national and international labor markets. Weaving together and engaging research on globalization, the social organization of science, and gendered societal relations as key social forces, this book addresses critical issues affecting women's contributions and participation in science. Also, while considering women's representation in science as a whole, examinations of women in the chemical sciences, computing, mathematics and statistics are offered as examples to provide insights into how differing

For the third worldwide report of its kind, THE LOCATION GROUP again scouted all highly frequented retail locations and shopping malls worldwide. The previous reports reached 100'000 readers so far. The very positive feedback and numerous requests we received on the 2012 and 2013 reports prompted us to extend our study to cover over 800 high streets and 500 shopping malls.

This volume contributes significantly to the ongoing international and Nordic paradigm shift in educational

leadership research. It advocates for going from a contemporary, mainstream functionalist paradigm to a reflexive paradigm, based on educational values and knowledge. The volume is built on the shared basis, that the purpose of education is, and must be, fundamental for school leadership practice. However, that is often forgotten in educational governance and policy. The basis of the argument is, that educational leadership needs to change from focusing on effectiveness and narrowly defined accountability towards focusing on leadership that is contributing to the general education of students. That entails that leadership research need to focus on complex

perspectives like context, relations, trust, sense making and social and human values, and less on control, outcomes, accountability and testing. The volume reminds readers about the need to raise awareness of the contexts of education and research, be they political, cultural, economic or ideological. Chapters analyze, discuss and compare research from Nordic educational leadership research systems: Denmark, Finland, Iceland, Norway and Sweden. The cross-system insights clarify the fundamental relations between policy/governance and research/practice and discuss forgotten dependencies and opportunities.
