Julie Powell thought cooking her way through Julia Child's Mastering the Art of French Cooking was the craziest thing she'd ever do -- until she embarked on the voyage recounted in her memoir, Cleaving. Her marriage challenged by an insane, irresistible love affair, Julie decides to leave town and immerse herself in a new obsession: butchery. She finds her way to Fleischer's, a butcher shop where she buries herself in the details of food. She learns how to break down a side of beef and French a rack of ribs -- tough physical work that only sometimes distracts her from thoughts of afternoon trysts. The camaraderie at Fleischer's leads Julie to search out fellow butchers around the world -- from South America to Europe to Africa. At the end of her odyssey, she has learned a new art and perhaps even mastered her unruly heart.

Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.
