An introduction to the ways in which ordinary Muslim Americans practice their faith. Muslims have always been part of the United States, but very little is known about how Muslim Americans practice their religion. How do they pray? What ' s it like to go on pilgrimage to Mecca? What rituals accompany the birth of a child, a wedding, or the death of a loved one? What holidays do Muslims celebrate and what charities do they support? How do they learn about the Qur ' an? The Practice of Islam in America introduces readers to the way Islam is lived in the United States, offering vivid portraits of Muslim American life passages, ethical actions, religious holidays, prayer, pilgrimage, and other religious activities. It takes readers into homes, religious congregations, schools, workplaces, cemeteries, restaurants—and all the way to Mecca—to understand the diverse religious practices of Muslim Americans. Going beyond a theoretical discussion of what Muslims are supposed to do, this volume focuses on what they actually do. As the volume reveals, their religious practices are shaped by their racial and ethnic identity, their gender and sexual orientation, and their sectarian identity, among other social factors. Readers gain practical information about Islamic religion while also coming to understand how the day-to-day realities of American life shape Muslim American practice.

A small but comprehensive, practical and informative guide on the subject. It comes with the Arabic text, it ' s English transliteration for those unfamiliar with the Arabic script, and translation of the obligatory prayers along with other prayers and supplications. Fully Illustrated.

This volume is concerned with the origins, development and character of ritual in Islam. The focus is upon the rituals associated with the five 'pillars of Islam': the credal formula, prayer, alms, fasting and pilgrimage. Since the 19th century academic scholarship has sought to investigate Muslim rituals from the point of view of history, the study of religion, and the social sciences, and a set of the most important and influential contributions to this debate, some of them translated into English for the first time, is brought together here. Participation in the ritual life of Islam is for most Muslims the predominant expression of their adherence to the faith and of their religious identity. The Development of Islamic Ritual shows some of the ways in which this important aspect of Islam developed to maturity in the first centuries of Islamic history.
