Check the signal at pin 8 of the electrical connector for the gearbox control unit. Check the accumulator solenoid valve. Check the connection to earth G504 and electrical connectors according to the wiring diagram for ZF automatic gearbox, see Maintenance and Repair Manual, group 16. GMS 2914. For blocks: 1532785, 1532786, 1532788, 1779828. Title:

Scania Gearbox and Retarder fault codes | Truckmanualshub.com

The clutch of our 124 Scania stopped working properly with the "14 speed" synchromesh gearbox. The first time it happened, it ground instead of smoothly going into reverse (a non-syncro gear), to back out of the shed. When this happens, it's also hard to select a forward (syncro) gear. Pumping the clutch a few times seems to fix it.

transmission - Scania clutch issue with synchromesh gearbox ...

you have a problem with your splitter or backsection part of the gearbox/transmission that is the section where the high and low sleeve is situated,also check that the air of the truck dont push to much air pressure to the valve that splits between the range as the force will cause the sleeve and synchro.s to wear out quickly,if it is so put a air restrictor on the bring the air pressure down ...

It all started in 1964 when two friends gave up promising medical careers to embark upon a journey which few hardened truckers would have considered. In so doing, they were solely responsible for creating the first long haul overland route, across Europe and deep into the Middle East to Kabul. The men had started the "Middle East Run" was to become a phenomenon in the road haulage industry, an image which it still holds today. This book is about the company founded by one of those men, from its fledgling days as Asian Transport to the thriving Astran Cargo Services Ltd that it is today. In this book Ashley Coghill documents the complete history of the company to date with the focus predominantly on the early days when the men were fighting for something and revelling in the adventure. These early long haul drivers would think nothing of a 10,000 mile round trip to Iran or the Arabian Gulf and being stranded at 6,000 feet on a mountain pass with temperatures below -40 was just all in a day's work. Ashley Coghill has an immense enthusiasm for his subject and has given his research total dedication. He has also tracked down past and present employees to gather first hand information which he has illustrated with over 300 carefully selected images. The end result is a detailed, comprehensive and fascinating account of an extraordinary company.

Brain Haulage was formed by Charles Edward Brain in 1950 and played a major role in the container revolution in the UK, completely changing the way goods were transported over the world. Peter Sumpter was a driver with Brain Haulage until it closed in 1992 and is an unofficial archivist of the brand, having taken hundreds of photographs and chronicling his adventures in a diary for over 20 years. Brain Haulage Ltd tells the history of Brain and the container revolution as well as the story of Charles Brain; from his early years working for the L.M.S. Railway at Camden Town, to his time in the R.A.F. during the second world war, to eventually starting his own haulage company. The rest of the story is from Peter's own diary and the many ex-drivers and Brains staff he worked with over the years. Including over 300 previously unpublished photographs Brain Haulage Ltd is a unique book, ideal for anyone interested in containers and their revolution, as well as road transport and haulage trade enthusiasts.
