Rather, scientific uncertainty is constructed both by science and by society in order to serve certain purposes. Recognizing the social role of scientific uncertainty will help us to see how many of our problems about risk are deeply cultural and cannot be overcome simply by the application of more and better science.

~~Scientific Uncertainty and the Politics of Whaling by...~~

It is precisely the nature of scientific knowledge, Heazle argues, that has made uncertainty a tool in service of political objectives. When scientific advice to whaling nations could not with absolute certainty declare whaling practices a threat to stocks, those IWC members with substantial investments of political and economic capital used this uncertainty to reject a reduction in quotas.

~~Scientific Uncertainty and the Politics of Whaling on JSTOR~~

"The Politics of Uncertainty questions the framing of uncertainty that has largely been transformed into calculable risks. Across a wide spectrum ranging from finance and banking to practices of modelling disease and climate change, the authors highlight the failings of institutions of illusionary control.

Alfred Moore and Michael K MacKenzie argue that greater openness about disagreement among diverse types of experts makes it harder for political leaders to politicise expertise Whenever scientists provide advice to political leaders they risk their expert authority being used in ways they cannot control in order to serve political ends. At one extreme, when they give unwelcome advice they risk ...
