Originally published in the 1940s, the author, a master of his craft, has clearly and concisely explained the making of both hand and string puppets, and also clearly shown how they may be used in appropriate settings. With the idea of giving assistance to the novice, and help to the more advanced student, the book is written in plain and concise language the diagrams and photographs should explain the intricacies of puppet-making, leaving the individual to fill in the details from his own imagination. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. Another crazy yarn from Australia's master of madness. The Paul Jennings phenomenon began with the publication of *Unreal* in 1985. Since then, his stories have been devoured all around the world.

live ideas of the day. Pressing Freudian and Saussurean categories into the service of a basically Marxist perspective, *The System of Objects* offers a cultural critique of the commodity in consumer society. Baudrillard classifies the everyday objects of the “ new technical order ” as functional, nonfunctional and metafunctional. He contrasts “ modern ” and “ traditional ” functional objects, subjecting home furnishing and interior design to a celebrated semiological analysis. His treatment of nonfunctional or “ marginal ” objects focuses on antiques and the psychology of collecting, while the metafunctional category extends to the useless, the aberrant and even the “ schizofunctional. ” Finally, Baudrillard deals at length with the

Implications of credit and advertising for the commodification of everyday life. The System of Objects is a tour de force of the materialist semiotics of the early Baudrillard, who emerges in retrospect as something of a lightning rod for all the live ideas of the day: Bataille ' s political economy of " expenditure " and Mauss ' s theory of the gift; Reisman ' s lonely crowd and the " technological society " of Jacques Ellul; the structuralism of Roland Barthes in The System of Fashion; Henri Lefebvre ' s work on the social construction of space; and last, but not least, Guy Debord ' s situationist critique of the spectacle.

a desert island in the heart of the Galapagos archipelago, where Darwin received his first inklings of the theory of evolution, two scientists, Peter and Rosemary Grant, have spent twenty years proving that Darwin did not know the strength of his own theory. For among the finches of Daphne Major, natural selection is neither rare nor slow: it is taking place by the hour, and we can watch. In this dramatic story of groundbreaking scientific research, Jonathan Weiner follows these scientists as they watch Darwin's finches and come up with a new understanding of life itself. *The Beak of the Finch* is an elegantly written and compelling masterpiece of theory and explication in the tradition of Stephen Jay Gould. With a new preface.

The classic personal account of Watson and Crick ' s groundbreaking discovery of the structure of DNA, now with an introduction by Sylvia Nasar, author of A Beautiful Mind. By identifying the structure of DNA, the molecule of life, Francis Crick and James Watson revolutionized biochemistry and won themselves a Nobel Prize. At the time, Watson was only twenty-four, a young scientist hungry to make his mark. His uncompromisingly honest account of the heady days of their thrilling sprint against other world-class researchers to solve one of science ' s greatest mysteries gives a dazzlingly clear picture of a world of brilliant scientists with great gifts, very human ambitions, and bitter rivalries. With humility unspoiled by false modesty, Watson relates his and Crick ' s
