Math conversion key. Memorize these! They are three things you will be converting the most in nursing school. 2.2 lbs = 1 kg; 1 oz = 30 ml; 1 inch = 2.54 cm; Side note: I never failed a math test and never failed a nursing course. If I can do it, you can too. Just study EXACTLY what they tell you to study. Swish! No more math exam tips needed!

*Math Exam Tips For Nursing School - Tips from a Nurse ...*

Maths for Nursing. All nurses need to be competent in the calculation of medication dosages. You need to know how to calculate required dosages accurately, including doses of tablets, doses of solutions, and intravenous fluid rates and medications. These drug calculations will require the application of some basic mathematics such as addition, subtraction, multiplication, and division.

6 Steps to Nursing Med Math Success. We created an amazing outline / mind map to help you navigate your math questions! Here's a quick run down of our 6 steps to nursing med math success! Step 1: Understand What They're Asking For; Step 2: What do You Have? Step 3: Do They Match? Step 3A: Convert the units if needed; Step 4: Is Time Involved?

*Master Guide for Med Math for Nurses - NURSING.com*

Math is used to calculate the flow rates for an IV. Nurses use math to calculate how much IV fluid to administer per hour, how many drops per minute, how much medication should be in the IV and how much medication should be dispersed in a given time period. These problems are solved using formulas that involve division and rounding numbers.
