" Thinking in Java should be read cover to cover by every Java
programmer, then kept close at hand for frequent reference. The
exercises are challenging, and the chapter on Collections is superb!
Not only did this book help me to pass the Sun Certified Java
Programmer exam; it's also the first book I turn to whenever I have a
Java question."

Secondly, it does exactly what the title suggests: It leads you to
think in Java - it does not give interesting or useful programs as
examples - simply code which demonstrates (well) the concept being
explained. Thirdly, it does not so much cover the practicalities of
Java as the theory behind it.

"Thinking in Java" (or TIJ for short) is a thick 1100 page volume with an original, distinctive cover. It is unique that not only all examples from the book, but the full text of the book is available from the author's website. I like the idea of cover -- the idea of programming as a kind of craft. Polished wood on the cover looks

natural. It's inspired by the "American Art & Crafts Movement ...
