Vespa GT 200. The GT200 is the first larger-frame modern Vespa, introduced in 2003 after the success of the ET-series, which led Vespa's return to the US market after a 20-year absence. The GT (or Grantourismo) was available in US dealers in 2004. The GT introduced the angular, beveled body style which has been the design foundation of all modern Vespa models since. The GT200 uses a carbureted ...

It was the late night Tai Bo fitness commercial warning him that life comes to an end after 40 that prompted Peter Moore to chase a boyhood dream. To go to Italy and seek out its celebrated dolce vita from the back of a Vespa. But it couldn't be just any old Vespa. Peter wanted a bike as old as he was and in the same sort of condition: a little rough round the edges, a bit slow in the mornings perhaps, but basically still OK. And it had to have saddle seats. And temperamental electrics. And a

little too much chrome. The sort of scooter you'd imagine a sharp-suited, Ray Ban-wearing young Marcello Mastroianni riding. Her name was Sophia. From picnicking in the Italian alps and rattling through cobbled hilltop to gate-crashing Frances Mayes's villa and re-enacting 'Roman Holiday', Vroom with a View is as much a romance as a travel adventure. For not only does Peter win the woman of his dreams, he falls for a side of Italy others rarely see. Along with Sophia, of course...

A motorcycle's electrical system can be daunting to even the most adept home mechanic. And yet, the more complex these systems become—and the more important to a motorcycle's function—the more useful, even critical, it will be to know something about them. That's where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin explains the principles behind motorcycle electrical systems and how they work. He details the various tools, such as multimeters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical problem. And in several hands-on projects, he takes readers on a guided tour of their vehicle's electrical system, along the way giving clear, step-by-step instructions for diagnosing specific problems.

From its origins the Italian battlefields of the Second World War, to movie roles as Audrey Hepburn's transport in Roman Holiday and Sting's stylish companion in Quadrophenia and on through the current vintage revival, the classic Italian motor scooter is an enduring design classic from the 20th century. Scootermania celebrates the superbly simple vehicles that are so symbolic of freedom, style and the modern world. Originating in the 1940s in Milan and Pontedera, Tuscany, the scooter became an enduring transport choice for young people and urban environments. Early chapters look at scooter racing and long-distance attempts, and their role as an anti-tank weapon in the French army. There is engaging coverage of place of scooters in popular culture from films, music and fashion including the way that a host of disparate groups has made the bikes their own – from the British Mods of the 1960s and 1980s to their role in American and Japanese fashion and in their Italian homeland. The evolution and design of classic models as the Vespa 150 GS and the Lambretta Li 150 Series 3 are covered while scooter stars such as Enrico Piaggio and Georges Monneret are celebrated in their own words. The book also includes a number of specially photographed features on modern scooter designers, collectors and artists.

Born 1906 in London as the son of an English mother and a German father, Rudolf Uhlenhaut was an engineer and designer for Daimler-Benz. He became famous for his achievements regarding the Silver Arrows, the 300 SL with the famous gull wing doors, the legendary Mercedes-Benz 300 SLR, known as the 'Uhlenhaut Coupé' and the various experimental C 111 versions well-known for several speed records. -- Uhlenhaut joined Daimler-Benz in 1931 after finishing his studies of mechanical engineering in Munich. In 1936 he took over as head of the racing department and conducted the Silver Arrows and Rudolf Caracciola to their 1937 European championship. Based upon the 300 SL 'Gullwing?', initially a thoroughbred racing sports car, he created the road versions W198 and the smaller open-topped W121, both launched at the International Motor Sports Show in New York 1954. Though Uhlenhaut never owned a car of his own, his official company car, a 300 SLR with a top speed of 290 km/h became famous as the Uhlenhaut Coupé, the fastest car of its day authorized for road use! -- This first ever comprehensive biography of Rudolf Uhlenhaut, illustrated with many previously unpublished photographs, depicts his life and technical achievements, presenting a complete compilation of all the patents he filed and exploring their significance. It also draws a vivid picture of the person behind the technical innovations and tries to explore his character and motivation.

Some of the most active and exciting contemporary photographers are documented in this latest offering from Upper Playground.
